

# 3D CARRIER BASKET TRANSPORTER

Item #:
Project:
Quantity:

## PRODUCT OVERVIEW

3D Carrier Basket Transporter systems carry prepared food products from the kitchen loading zone to a remote service/ front counter zone, which is not in-line with loading point, either on the same floor or on a different level. Carriers are continuously loaded and unloaded to ensure consistent delivery of fresh product to customers. System route can be in 3-dimensional directions with fully customizable track options.

## STANDARD PRODUCT FEATURES

- Aluminum, stainless steel, and plastic design ensures easy cleaning and maintenance
- Customized design to best suit the unique project requirement - enable a challenging site layout or build an extended selling point.
- Efficient and hygienic delivery system moves multiple products between building floors within seconds
- Modular track design ensure flexibility to meet any site conditions and ease of installation
- Lightweight design and low-power motor reduces power consumption
- Built-in safety features and emergency shut-off system ensure safe operation of system at all times
- Includes spare parts box with critical parts for peace of mind
