

Coffee is a raw material closely related to our company's history and is core (the bean) to our business segment. Through our everyday actions we hold a clear responsibility to the environment, part from which such raw materials derive as well as the people it inhabits.

Our support for Ethiopia - Promoting Wild Forest Coffee as a sustainable livelihood. As part of Franke Coffee Systems' Green+Gentle Concept, we have decided to support the Efico Foundation for the second consecutive year. The project chosen is located in Ethiopia and evolves around Wild Forest Coffee, as a sustainable source for secured living. In conjunction with this project 7'500 farmers and their families (total: 45'000 people) are supported, who are substantially dependent on nature to ensure their everyday living. Utilizing forest coffee is central to this project - from the seed to the independent commercialization.
