Evolution Plus
Translation of the original operating instructions

Read the operating instructions and the chapter on safety information before operating the machine.
Keep the operating instructions near the machine.
Dear customer,

Congratulations on your purchase of an Evolution Plus coffee machine. Thank you for your confidence in us.

Evolution Plus is a powerful and space-saving coffee machine. It adapts to your needs perfectly. Your customers will be impressed as you quickly prepare high-quality, customized coffee specialties.

We hope you enjoy your Evolution Plus and that it will bring you consistently satisfied customers.

Sincerely, FRANKE Kaffeemaschinen AG

Explanation of Symbols

**DANGER** indicates potentially life-threatening danger or grave injury.

**WARNING** indicates risk of injury.

**CAUTION** indicates risk of minor injury.

**NOTICE** indicates possibility of damage to the machine.

Disinfecting a component.

This symbol indicates tips, shortcuts and additional information.
For Your Safety

Both you and your Evolution Plus are important to us. Therefore, we would like to provide you with detailed safety information. For us, a high level of safety goes without saying. Protect yourself against remaining risks from use of the machine.

Proper use

Evolution Plus

The Evolution Plus is a coffee machine for use in food service. It is designed to process whole coffee beans. The various accessories allow integrated processing of milk, powder specialties and syrup with the Evolution Plus.

The Evolution Plus is designed exclusively for preparing coffee drinks, milk combination drinks, hot water and steam in accordance with these instructions and the technical data.

Refrigeration Unit/Milk Systems (optional)

Milk systems are optional accessories for Evolution Plus coffee machines. They are to be used only to cool milk in conjunction with preparing coffee drinks with an Evolution Plus coffee machine.

Only use pre-cooled milk (2 - 5°C/36 - 41°F). Only use FRANKE cleaning solution. Other detergents may leave a residue in the milk system.

Cup Warmer (optional)

The cup warmer is an optional accessory for Evolution Plus coffee machines. It is intended only for warming coffee cups and glasses used when preparing drinks.

The cup warmer is not designed to dry dish towels or other cloths. It is not necessary to cover the cups to warm them.

Flavour Station (optional)

The Flavour Station is an optional accessory for the coffee machines. It is intended only for the automatic pumping of syrups for the preparation of drinks.

Important

Do not operate your Evolution Plus and its accessories until you have read and understood these instructions in full. Keep these instructions near your Evolution Plus.

Each operator of the Evolution Plus must have read and understood these instructions. This does not apply to self-service customers. Self-service machines must always be monitored to protect the users.

Children or physically or mentally challenged persons must never approach the machine alone and must always be supervised.

Have the machine serviced at regular intervals. Regular maintenance will ensure the safe operation and high performance of your Evolution Plus.

If the Evolution Plus is sold or transferred to a third party, please give the operating instructions to the next user.

If you need more information or if specific problems occur that cannot be resolved using these instructions, contact your local customer service representative for the required information or contact FRANKE Kaffeemaschinen AG in Aarburg, Switzerland, directly.
General safety concerns during use

**DANGER**

Risk of death by electrocution!
- Never operate a machine that has been damaged or has a damaged power supply cable.
- If you suspect damage to the machine (for instance, a hot or burning odor), unplug the machine from the outlet and contact your service technician.

If the power supply cable to this machine is damaged, it must be replaced by a special power cord.
- Only a qualified service technician should replace the power supply cable.
- Ensure that the machine and power supply cable are not near any hot surfaces such as gas or electric stoves or ovens.
- Ensure that the power supply cable is not pinched and does not rub against sharp edges. The machine contains electrically conductive parts. Opening the machine can pose risk of death.
- Never open or attempt to repair the machine yourself.
- Do not make any modifications to the machine that are not described in the owner’s manual.
- Repairs should only be made by a service technician using original replacement and accessory parts.

**WARNING**

Risk of injury, eye injury and damage to the machine!
Objects in the coffee bean hopper, powder container or grinder may splinter and be ejected, leading to damage to the machine or injury.
- Never put anything into the bean hopper, powder container or grinder.
- Never poke around in the coffee bean hopper or grinder with any object.

**WARNING**

Risk of injury!
Reaching into the Evolution Plus may result in abrasions or injuries caused by crushing from interior components.
- Only open the Evolution Plus when daily work requires it (to empty the grounds container).
- Exercise care and caution when working on an open Evolution Plus.
- Only service personnel should open the Evolution Plus for any other purpose.
**For Your Safety**

**WARNING**

Risk of scalding!
During automatic and manual cleaning, hot water and steam are released repeatedly.
- Keep hands away from the outlets and nozzles during cleaning!

When drinks are dispensed, the products themselves pose a risk of scalding.
- Always be careful with hot drinks!

**WARNING**

Risk of burns!
The coffee and milk dispensers, hot water nozzle and steam dispenser are hot.
- Do not touch the outlets or nozzles.

The surfaces of the cup warmer are hot.
- Do not touch these surfaces.

**WARNING**

Risk of spoiled food residue!
If the machine is not cleaned regularly, milk, powder, syrup and coffee residue may accumulate in the machine, clog the outlets or find its way into drinks.
- Clean the Evolution Plus and its accessories at least once a day.
- Read the chapter “Cleaning and Rinsing.”

**NOTICE**

Damage to the machine!
- Install the machine out of the reach of children.
- Do not expose the machine to the elements, such as rain, frost or direct sunlight.

The power supply cable may pose the risk of tripping or become damaged.
- Never let the power supply cable hang loose.

**NOTICE**

Damage from foreign objects!
Putting foreign objects through the powder lid can lead to damage to the machine.
- Never insert any foreign objects.
- Never poke around in the powder lid with any object and never insert anything except cleaning tablets or ground coffee.

**NOTICE**

Damage from water jets!
The Evolution Plus is not protected against water jets.
- Do not use water jets or high-pressure cleaners to clean the machine.
- Read the chapter “Cleaning and Rinsing.”
Scope of Delivery and Identification

The Evolution Plus is a powerful coffee machine with an innovative operating design. You can prepare each customer’s customized drink using the Preselection Plus panel. Listed below are ways to identify your machines and what is included in the standard delivery.

Scope of delivery

Evolution Plus
Basic model. Optional accessories can be ordered from your FRANKE retailer.

Cleaning tablets
To clean and protect your coffee system.
Item no: BK 300 935

Cleaning solution (optional)
To keep your milk system clean and hygienic.
Item no: BK 301 732

Cleaning brush
To clean the brewing unit.
Item no: 1L 301 160

Cleaning brushes (optional)
To clean the dispenser system.
Item no: 1L 301 376
Adjust Card
To program the machine and back up data.
Item no: 10 300 924

Microfiber cloth
To clean and protect the exterior of the machine.
Item no: 1H 325 974

Owner’s manual
Operating instructions
Item no: 1T 312 218
Item no: 1T 312 219
Item no: 1T 312 220
Item no: 1T 312 221

Also refer to the chapter "Cleaning and Rinsing."

Other manuals can be downloaded via the Internet.
www.franke-cs.com

The configuration of your Evolution Plus may differ from that shown in the instructions. Please refer to your purchase agreement. Additional accessories may be obtained directly from your retailer or from FRANKE Kaffeemaschinen AG in Aarburg, Switzerland.

Scope of Delivery and Identification
Description of machine

You have chosen enjoyment of every single coffee with the Evolution Plus. In this section you will learn more about the functions and options of your Evolution Plus and where the controls are located.

Evolution Plus

The Evolution Plus has numerous options. To give you an overview of your machine, we will illustrate various options with a sample configuration.

You will become familiar with the Evolution Plus and its controls as well as the refrigeration unit and cup warmer.

Please note that your Evolution Plus may look different from the configuration shown here.

<td>25 liters</td>
</tr>
</tbody>
</table>

* The hourly capacity is a theoretical value and depends on the configuration of the machine(s) and the size of the drinks. Because of its innovative milk system, the Evolution Plus with Foam Master has a much higher hourly capacity for milk than the Evolution Plus. Your sales representative will be glad to help you.
Evolution Plus operating concept

The Evolution Plus offers controls customized to your product offering depending on the configuration. You may store set default products or combine and measure your products individually. Your sales manager and service technician will be glad to help you.

Dispense your drinks as usual using the product buttons or define each customer’s drink individually using the Preselection Plus panel.

For instance, you might preselect the cup size and type of coffee or make an espresso with decaffeinated beans instead of regular beans.
Optional accessories

On/Off switch (behind door)

Refrigeration unit (optional)
In many regions, milk is part of a good cup of coffee.
You can connect the milk cooler directly to the Evolution Plus to make sure the milk does not spoil.

Cup Warmer (optional)
To enjoy coffee at its best, you need pre-heated cups.
The cup warmer fits perfectly on your Evolution Plus.

Flavour Station (optional)
Our syrup unit is available as an option for amazing creations.
You can use the Flavour Station to extend your range with up to 6 different flavors.
Installation and technical data

Your Evolution Plus must be properly installed so that you can operate it correctly—one of our service technicians will do that for you. You'll have to take care of a few things first. You'll find the preparations for problem-free enjoyment of your coffee machine here.

Installation

Preparations

- The power connection for the coffee machine must be protected by a ground fault circuit interrupter (GFCI).
- Each terminal of the power supply must be able to be interrupted by a switch.
- The water connection must have a shut-off with a check valve and filter and must meet the requirements of the technical data.
- The water for the preparation of coffee should always be fresh, oxygenated and rich in minerals.
- If your Evolution Plus has an electrical connection other than the one described in the table opposite, you will have received additional information regarding the installation with your order confirmation.

Installation

You must have completed these preparations before one of our service technicians can install Evolution Plus for you.

One of our service technicians will install your Evolution Plus and put them into operation for the first time. The technician will walk you through the basic functions.
Dimensions

**Front view**

**Side view**

**Top view**

**Cross-section from above** (grommet hole)

## Installation Dimensions

Prepare a stable, ergonomic surface (min. load capacity: 150 kg). The control panel should be at eye level.

Distance to the wall must be at least 50 mm (1.96”). Clearance above the machine must be at least 200 mm (7.78”).

Adjustable feet can be used to compensate for unevenness or height differences.

If optional accessories are installed, up to an additional 320 mm (12.6”) may be required per accessory.

Observe the connection requirements of the accessories.

### Adjustable feet (optional)

<table>
<thead>

---

**Installation Dimensions for Optional Accessories**

Place the optional accessories in line with the Evolution Plus and at eye level.

Distance to the wall must be at least 50 mm (1.96”). Clearance above the machine must be at least 200 mm (7.78”).

Adjustable feet can be used to compensate for unevenness or height differences.

If optional accessories are installed, up to an additional 320 mm (12.6”) may be required per accessory.

Start-up, Filling and Emptying

In this chapter you will learn how to start up your Evolution Plus. In addition to the start-up procedure, you will learn about processes that take place automatically during start-up and about additional preparations. Get primed for a busy day!

Start-up of the Evolution Plus

Daily start-up of the coffee machine

⚠️ WARNING

Risk of scalding
from hot water, splatters and hot steam.
Do not touch the outlets or the area under the outlets.
Point the steam wand downwards.

01 Switch on the Evolution Plus using the On/Off button.
02 The Evolution Plus automatically vents the boiler system while heating.
03 Add coffee beans and milk, if necessary.
04 The Evolution Plus is ready for operation.

Filling the coffee bean hopper

⚠️ WARNING

Risk of injury, eye injury and damage to the machine!
Objects in the coffee bean hopper or grinder may splinter and be ejected, leading to damage to the machine or injury.
Never put any objects in the coffee bean hopper or grinder.
Never poke around in the coffee bean hopper or grinder with any object.

01 Open the coffee bean hopper.
02 Pour in coffee beans.
03 Close the coffee bean hopper.
Emptying the grounds container

**NOTICE**
**Formation of mildew due to coffee residue!**
Empty and clean the grounds container at least once daily.

1. Open the grounds container door and remove the grounds container.
2. Empty, clean and dry the grounds container.
3. Replace the grounds container and close the grounds container door.

**NOTICE**
**The quality of the coffee may be impaired!**
Dry the coffee bean hopper well after cleaning it. There must not be any residue from cleaning agents.

Emptying the coffee bean hopper

**NOTICE**
**Handling the bean pusher and coffee bean hopper**
The bean pushers cannot be completely removed!
The bean pushers fit relatively tightly.
Ensure proper closure and slide the bean pusher in again, if necessary.

1. Slide the bean pusher inward to close off the coffee bean hopper.
2. Lift the coffee bean hopper straight up.
3. Empty, clean and dry the coffee bean hopper.
4. Place the coffee bean hopper on the Evolution Plus.
5. Pull the bean pusher out.
Add chocolate powder.

**WARNING**

Risk of injury, eye injury and damage to the machine!
Objects in the coffee bean hopper, powder container or grinder may splinter and be ejected, leading to damage to the machine or injury.
Never put anything into the bean hopper, powder container or grinder.
Never poke any object around in the bean hopper, powder container or grinder.

Emptying the powder container

**NOTICE**

Product quality may be impaired!
Dry the powder container well after cleaning it. There must not be any residue from cleaning agents.

01. Lift the powder container straight up.
02. Empty, clean and dry the powder container.
03. Clean the powder container holder with a brush.
04. Place the powder container on the Evolution Plus.
Start-up of the Refrigeration Unit (optional)

Open the refrigeration unit and switch it on with the On/Off switch.

Setting the temperature of the refrigeration unit (KE 320) (optional)

- **Thermostat**
  - Temperature display
  - Right button
  - Set button
  - Left button

**Start-up of the Refrigeration Unit (optional)**

1. Open the refrigeration unit and switch it on with the On/Off switch.

2. The thermostat is located in the refrigeration unit and can be set manually.

3. Press Set until the temperature is displayed.

4. Set the desired temperature using the left or right button.

5. Press Set. The temperature is set.
### Filling milk (optional)

Instead of the milk container, you can also use bag-in-a-box containers or gallon containers. Milk quantity and temperature are monitored constantly.

1. Open the refrigeration unit and remove the milk container.
2. Add milk to the container and insert the suction tube.
3. Slide in the milk container and close the door.
4. Prime the milk.

### Priming the milk

**PRIMING MILK:**

Every time the milk system is cleaned, the milk lines have to be refilled.

The milk priming function performs this task for the existing milk pump.

If the machine is to be switched off, milk priming is not necessary.

**PRESELECTION FUNCTION WHEN PRIMING:**

Usually, milk line 1 is always filled. To fill a second milk line (if available):

1. Press Clean for at least 2 seconds.
2. Preselect the second milk type with Preselection Plus
3. Select Prime milk and hold the button.

**WARNING**

Danger of scalding from hot milk and hot steam.

Do not touch the outlets or the area under the outlets.

1. Press Clean for at least 2 seconds. Clean menu appears.
2. Select Prime milk and hold the button.
3. The Evolution Plus will draw milk into the system.
4. Milk will come out of the outlet. The milk lines are filled.
Emptying the refrigeration unit (optional)

**NOTICE**

The refrigeration unit may not be used to store milk!

1. Open the refrigeration unit and remove the milk container.
2. Store the remaining milk in a refrigerator or dispose of it.
3. Clean the milk system of the Evolution Plus.

**NOTICE**

The refrigeration unit may not be used to store milk!

4. Clean the milk container and refrigeration unit.
5. Close the refrigeration unit.

**CAUTION**

Beware of spoiled milk!

If the machine is not cleaned regularly, milk residue may accumulate in the machine, clog the dispensers or find its way into drinks.

Clean the EVOLUTION PLUS and its accessories daily.
Open the refrigeration unit and switch it on with the On/Off switch.

Adding syrup

ASSIGNING THE SYRUP VARIETIES
A labeling field can be found on the inside of the door. Note the corresponding syrup variety by the respective position number.

Open door of the Flavour Station and switch on the Flavour Station.

Place syrups in the Flavour Station and insert all tubes.

Prime syrups, then close door.
Priming Syrups

PRIMING SYRUP
For optimum drinks quality, there must be syrup in the lines at the very beginning. You must prime the device so that syrup is drawn back into the lines each time syrups are changed and after cleaning.

1. Press CLEAN on the Evolution Plus until the Clean menu appears.
2. Preselect a syrup within 10 seconds. Press and hold the priming button.
3. The requested syrup is drawn in.
4. Release the product button if syrup escapes from the outlet. The syrup variety is ready.
5. Repeat the procedure with all other product buttons for syrup (syrup variety).
6. All syrups are ready.

Emptying the Flavour Station

1. Open Flavour Station door.
2. Remove hose and remove syrup for required variety of syrup.
3. Clean syrup system, if necessary.
4. Close Flavour Station door.
Preparing drinks

You chose the Evolution Plus because you love coffee and promise your customers something special. You will find information about preparing drinks and the variations possible for your specialty drinks here.

Preparing a standard drink

**WARNING**

Risk of scalding or burning!
The dispensers and drinks are hot. 
Only touch the outlets on the insulated handles. 
Do not touch the area under the outlets. 
In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.

1. Place a suitable cup or glass under the outlet.
2. Set the outlet at the correct height.
3. Select menu level (if possible).
4. Press the product button desired.
5. Preparation begins.
6. The drink is ready.

You chose the Evolution Plus because you love coffee and promise your customers something special. You will find information about preparing drinks and the variations possible for your specialty drinks here.
Drink preparation with preselection

You can preprogram up to 10 drinks per setting. Drink preparation with preselection must be enabled. Only an authorized service technician can enable preprogrammed settings. Contact your service technician or FRANKE Kaffeemaschinen AG in Aarburg, Switzerland, directly.

**WARNING**

Risk of scalding or burning!
The dispensers and drinks are hot.
Only touch the outlets on the insulated handles.
Do not touch the area under the outlets.
In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor. Pay attention and work carefully.

**WARNING**

Risk of scalding!
The next drink starts automatically. Pay attention and work carefully.

01-05

01 Keep appropriate cups and glasses handy.

02 Set the outlet at the correct height.

03 Press the Product button. Preparation of the first drink is started.

04 Other drinks can be preselected while the current drink is being prepared.

05 Preparation of the next drink starts immediately.
Preparing a drink with Preselection Plus

EXAMPLE OF USE FOR PRESELECTION PLUS

The following can, for instance, be selected on the Preselection Plus panel:

Column 1: Cup size
Column 2: Type of coffee
Column 3: Milk type

The customer can therefore mix his/her special coffee individually to taste.

WARNING

Risk of scalding or burning!
The dispensers and drinks are hot.
Only touch the outlets on the insulated handles.
Do not touch the area under the outlets.
In case of scalding or burns, immediately cool the affected area and, depending on the severity of the injury, consult a doctor.
Pay attention and work carefully.

01 Preselection Plus

02 Place the appropriate cup or glass under the outlet.

03 Select cup size on the Preselection Plus.

04 Select type of coffee on the Preselection Plus.

05 Select milk type on the Preselection Plus.

06 Select the desired product with the product buttons.

07 Preparation begins.

08 The drink is ready.
Hot water dispenser

⚠️ WARNING
Risk of scalding or burning!
The dispensers and drinks are hot.
Only touch the outlets on the insulated handles.
Do not touch the area under the outlets.
In case of scalding or burns, immediately cool the affected area
and, depending on the severity of the injury, consult a doctor.

Place the appropriate cup or
glass under the outlet.

Press the product button for
hot water.
The drink is prepared.

Steam dispenser

⚠️ WARNING
Risk of scalding or burning!
The dispensers and drinks are hot.
Only touch the outlets on the insulated handles.
Do not touch the area under the outlets.
In case of scalding or burns, immediately cool the affected area
and, depending on the severity of the injury, consult a doctor.

Place the appropriate cup or
glass under the outlet.

The steam is drawn for as long
as the time control was set or
must be ended manually.

Press or hold the product button for steam.
Preparation begins.
Frothing milk with Autosteam Pro (optional)

The Autosteam is an automatic steam wand. Depending on the settings, hot milk or milk froth can be made fully automatically with the Autosteam. Your service technician will inform you of the options and program the desired products.

1. Place a suitable pitcher or a suitable vessel under the Autosteam.

2. Press the product button for steam. Preparation begins and is ended automatically.

3. Press the product button for steam twice. The short steam pulse cleans the system.

4. Press the product button for steam. The preparation continues until the milk or milk froth reaches a set temperature. You can change the temperature with your Adjust card.

5. Wipe the Autosteam with a damp cloth.

6. The Autosteam can be used again.

Your machine may differ from the one shown here, depending on the version. The functions, however, are identical.
Cleaning and Rinsing

Even a coffee machine like the Evolution Plus must be cleaned at least once daily to ensure high-quality flavor. To keep you from spending too much time cleaning your machine, we developed our Clean & Clever cleaning system.

Overview of the Separate Cleaning Instructions

Select the correct cleaning instructions for your system, taking the functions of your coffee machine into consideration. The Evolution Plus Foam Master always requires a milk system, so that in this case all models without milk systems can be eliminated.

Clean the water and steam nozzles

**WARNING**

Risk of burns from hot outlets or nozzles.

Let the machine cool down. When the machine has cooled down, remove and clean the nozzles.

01

Unscrew the nozzles and take them apart.

02

Clean the nozzles with a mild detergent and descale where necessary.

03

Put the nozzles back together and screw them back on.

Rinsing the coffee and milk systems manually

**WARNING**

Danger of scalding from hot water and steam.

Do not touch the outlets or the area under the outlets.

01

Press Clean for at least 2 seconds. Clean menu is displayed.

02

Select Rinse

03

The Evolution Plus rinses the coffee and milk systems.

Cleaning is necessary to prevent residue build-up in the coffee and milk areas!
Configuring your Evolution Plus

Your Evolution Plus can be programmed to suit your personal needs—so that the Evolution Plus is just as flexible as you. We have kept the programming simple to make your job easier. Try it for yourself.

Controls and control concept

Insert the Adjust card into the card reader with the chip to the back.

The customer menu appears on the display.

With the keys for CURSOR UP or DOWN you can scroll through the menu.

Press CLEAN to confirm a selection.

With +/- you can set values.

The Adjust card is used for:
- Access restrictions
- Modification of parameters
- Storing saved settings

Shut-down and disposal

Do you want to shut down your Evolution Plus for longer periods or take it out of service? Contact our service department. We recycle our coffee machines at a rate of nearly 100%, in order to protect the environment and resources.

Shut-down

If you plan to take your Evolution Plus out of service for an extended period of time, take advantage of our service.

1. Clean the Evolution Plus using the cleaning program.
2. Turn off the Evolution Plus and unplug the power supply cable.
3. Turn off the water feed and remove the canister if there is one.
4. Remove all leftover food from the Evolution Plus and the accessories.

Shut-down for longer periods and storage

Risk of damage to the machine!
Contact your FRANKE service team for proper storage.
Observe the storage conditions and drain your coffee machines.
Storage temperatures: +10°C to +35°C
Humidity: max. 80%
If you plan to start using your machine again later, taking advantage of our service is essential. The Evolution Plus must be maintained and installed.
Proper functioning of the Evolution Plus cannot be ensured otherwise.

Disposal

Disposing of consumable materials
Observe local disposal regulations when disposing of consumable materials and waste.

Disposing of Your Evolution Plus
You can return your Evolution Plus directly to your retailer at no charge. We'll take care of the rest for you. For environmental protection reasons, we ask you not to dispose of the machine yourself.
# Troubleshooting and Error Codes

If a problem occurs, your Evolution Plus coffee machine will give you instructions. Error codes are displayed via the display screen. The table below shows how you can respond to these errors. Should you be unable to resolve a problem despite all best efforts, please contact our service department.

Safety you can trust. Your Evolution Plus coffee machine is not only among the most modern coffee machines in the world, it has also successfully passed safety inspections and tests for electromagnetic compatibility.

**Declaration of conformity**

FRANKE Kaffeemaschinen AG in Aarburg, Switzerland, certifies that the Evolution Plus and its optional accessories comply with the following standards. If you would like to see a copy of the original declaration of conformity, please contact FRANKE Kaffeemaschinen AG in Aarburg, Switzerland, directly.

**Evolution Plus has been checked for compliance with the following standards:**
EN 60335-1, EN 60335-2-14, EN 60335-2-15, EN 60335-2-64, EN 60335-2-75

**Other standards that were applied:**
EN 55014-1+A1+A2, EN 55014-2+A1, EN 50366+A1, EN 61000-3-2, EN 61000-3-3+A1+A2,
IEC 62233, IEC 61000-3-2, IEC 61000-3-3+A1+A2, CISPR 14-1, CISPR 14-2-97+A1

**The inspection was performed in accordance with the following directives:**
73/23/EWG, 89/336/EWG, 93/68/EWG, 2006/42/EC
