OCTOBER 2021
Setting new standards in kitchen style and performance

MAKE IT WONDERFUL
For a more sustainable, socially responsible world

The need to create a more environmental and socially sustainable world is well known and understood. And Franke is focused on playing its part.

From adopting manufacturing methods that generate less waste and reduce our impact, to innovative products designed to cut water and energy usage and reduce landfill, we’re doing all we can to meet our sustainability goals. And by working with us, we can help you to do the same.

Environmental responsibility

No Franke product is manufactured without careful consideration of the resources used. Optimising the eco-sustainable use of these resources is of primary importance; as is reducing emissions, recycling waste materials and increasing the energy efficiency of our products.

As proof of this commitment, Franke has been an active member of the UN Global Compact since January 2011. We also participate in the activities of the local Global Compact network in Switzerland.

Resource-efficient products

When striving to reducing our environmental impact, our products' greatest contribution comes from being able to use less energy and water.

At the same time, we want customers to save money when using our products. This is why we are constantly working on making everything we offer more resource efficient.

Social responsibility

Healthy, committed and well-trained employees and managers are the key to the success of any company. With thousands of employees located at multiple sites across five continents, Franke’s workforce plays a key role in our sustainability efforts. And as such, they are our most valuable asset.

As an employer, we bear a social responsibility for them and their families. Therefore, we support them in staying healthy and continuously developing their skills. Not only does this avoid accidents in the workplace, it also contributes to the continuous improvement of working conditions through regular employee surveys, which in turn increases staff engagement.

Water consumption

The water used within the manufacture of our products mainly comes from the public water supply, with some water been taken from wells in selected locations. In 2019, our total water consumption across all our factories was less than in 2018.

One change that contributed to this reduction was the optimisation of a varnishing process at our factory in Heshan, China. The water used in this process is now recirculated within the machine and only emptied every one to two months.
Franke continues to innovate in key product areas

As a world leader in the design and manufacture of intelligent products and solutions for residential and professional audiences, we continue to lead the way in developing high-end design innovations.

Franke has built a reputation on producing high quality sinks and state-of-the-art instant boiling water taps and we are extremely proud of what we produce. Looking ahead we are delighted to be introducing some impressive new lines into our range.

We are committed to ensuring our customers experience the pleasures that cooking, eating and entertaining in a kitchen fitted with our products can bring. This is the very essence that inspires us to Make it Wonderful.

More ways we’re making it wonderful

Franke continues to innovate in key product areas

It’s easy to be ordinary, to have an ordinary home, filled with things you neither love nor hate. But you should never settle for ordinary and that’s why we want to make everything we make wonderful. Wonderful turns a house into a home and turns work into play. Every Franke product aims to be wonderful in every way, from the first glimpse of carefully considered design, to manufacturing standards that ensure you can feel the quality and craftsmanship of every piece.

This brochure captures the spirit of wonderful in order to captivate and inspire you. A comprehensive range of sinks, taps and accessories can help turn an everyday kitchen into the extraordinary and turn a daily chore into a guilty pleasure.

Let everyone else be ordinary, while we make it wonderful.

Swiss precision engineering

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we’ve established efficient and economic manufacturing facilities all around the world. Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart and stunning design.

Over one hundred years of passion

Making something wonderful rarely happens overnight, and Franke has been pushing the boundaries for over 100 years. Founded in 1911, Franke was built on a foundation of precision engineering combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world’s largest manufacturer of kitchen sinks.

Guaranteed for half a century of wonder

Once you’ve realised the kitchen of your dreams, it’s only natural you want to retain it for as long as possible. To do that, you need reliable products of outstanding quality and Franke is guaranteed never to let you down. A huge 50 year guarantee on our sinks means that your Franke sink will be with you through those big moments in life and be part of your family for a generation or more.

We’re confident, so you can be too

Few other manufacturers can offer such a promise to you and that’s because we are dedicated to the highest standards of design and craftsmanship. Our guarantee protects your sink against manufacturing defects for half a century.

Great guarantees on our other products

You also have the peace of mind of a superb guarantee on our taps, which protects against defective materials and workmanship in the valve mechanism for 5 years and covers you for coatings and finishes for 1 year (5 years for stainless steel taps).

Our waste disposal units carry a 10 year guarantee - which is unmatched by any other brand.

Full details of our guarantees can be found on our website, but no matter which Franke product you choose, you can look forward to many years of trouble-free use. It’s a product that stays in your family home so long, it’s almost part of the family.

Visit www.franke.co.uk/guarantee
Complete your dream with ease

Find a sink to suit your style
To help you navigate the wide range of design, installation and functionality considerations surrounding your choice of sink, you'll have detailed information at your fingertips. Each option is explained fully over the following pages.

Add your perfect tap
Franke taps combine outstanding performance and stunning design to suit your taste – whatever it may be. Our taps are designed to fit a standard 35mm tap hole (except where indicated). It is also important to identify whether your home has a high or low pressure water system, as it will affect your choice of tap – your installer or kitchen retailer should be able to help with this.

Choose accessories and extras
We also have a number of stylish and innovative products that are specifically designed to enhance the aesthetics and functionality of your sink, streamlining kitchen tasks to preserve its look and longevity.

Discover full kitchen solutions
A working kitchen doesn’t have to be a cluttered kitchen. Our range of clever storage and waste products helps to maintain a clean and clear space for those with even the busiest of lifestyles.

Innovation is in our DNA
We continue to be passionate innovators and our aim is to constantly improve the look and usability of our designs. Staying at the forefront of the industry is vitally important to us, so we have continually enhanced manufacturing techniques and made pioneering use of new materials to explore exciting new design possibilities. This means our range is always evolving to include the very highest levels of form and function.
Franke Rollamat
The Franke Rollamat is a handy accessory, which can be used to drain glasses or crockery, but also doubles as a trivet to protect the work surface from hot and heavy cookware straight from the oven, hob or grill. When not in use, this innovative accessory can be rolled up and conveniently stored away.

The Rollamat can be used on any work surface and therefore with any undermount sink, but will specifically fit the drainer on certain inset sinks.

Push-button pop-up waste
A pop-up waste enables you to conveniently empty the bowl without putting your hands in the sink. The patented push-button system from Franke has been tested to not only give you an extremely robust feature, but it looks great.

Instant Boiling Water Taps
Get instant 100°C water at your fingertips, straight from your kitchen tap, with Franke Instant Boiling Water Taps. Perfect for making drinks or getting meals underway in a flash, they combine safety, stylish design and cutting-edge technology. The innovative electronically controlled Minerva 4-in-1 tap features a child safety function and filter warning light, while the Omni is the world’s first mechanical 4-in-1 tap, providing filtered water alongside hot, cold and boiling water.

Hygienic Overflow
Many Franke sinks come with a Hygienic Overflow, which offers versatility for cleaning. Simple removal of the logo plate reveals the overflow aperture for easy, hygienic cleaning.

Box Center
Thanks to the new Box Center, the most important kitchen accessories become part of the sink unit and accessible all the time. These brand new large bowls are now available as inset/flushmount and undermount options and are a perfect combination, blending exceptional functionality with shining, minimalist design.

Andy Chef
Andy Chef is the ingenious solution for a well-organised and stylish kitchen, combining all the essential food preparation accessories you need on a daily basis. This compact, tailor-made holder includes a wooden chopping board, a professional chef knife and a strainer bowl and fits perfectly with our Box BXX range of sinks. Built to last in stainless steel and with a playful design, this sleek holder is the perfect addition to your family home. Thanks to its practical inner design, the accessories can also be safely stored and will dry entirely overnight.

Slimfix®
The Slimfix® technology has enabled Franke designers to reduce the width, depth and profile of the outer rim, resulting in a sink virtually flush with the worktop and has a bowl and drainer which is deeper and more three-dimensional in appearance.
Details that make a difference

At first glance, some features seem to be little more than decoration; others, you may not even notice at all. Sometimes, however, small details can make a huge difference. Whether it’s to save you time, make cleaning easier, boost performance or simply provide an efficient solution for life’s little challenges, every aspect of a Franke sink is carefully designed to make life easier.

Advanced waste systems
Franke sinks are equipped with stainless steel basket strainer wastes which can be used to prevent foodstuffs from entering the waste system. But the attention to detail does not stop there; underneath the sink, Franke waste kits may include such features as Sanitized® anti-bacterial properties and fast flowing air vent systems, whilst always ensuring they are as low-profile as possible, allowing you to benefit from extra cupboard space.

Deeper bowls
Many Franke stainless steel sink bowls are formed using a manufacturing technique known as deep-drawing and annealing. The bowls are formed using a 2-stage process which starts with deep drawing a flat sheet of steel. The annealing process allows the final bowls to be deeper, without compromising the integrity of the steel.

Heat and sound insulation
Selected Franke stainless steel bowls are sound insulated to reduce the sound of water in the bowl. This is achieved by rubber insulation pads under the sink, or by a sprayed dynaphon layer, applied during manufacture. The grey dynaphon spray also insulates, minimising heat escaping from the bowl, keeping water warmer for longer.

Waste disposal units
Clever design frees the kitchen from unsightly and unhygienic organic household waste, leaving you to enjoy a clean and tidy kitchen. With an ease of use that’s hard to beat, it can even take the most mundane of daily chores and turn it into a little guilty pleasure.

Thanks to a permanent magnet motor, Franke Turbo Elite Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquified into fine particles that are easily flushed through the pipework system.

Sink accessories
It’s the little things that make life extra special, so we’ve developed a range of extras to do just that. People use their sink in different ways, so these products correspond to common kitchen activities, complement the design of your Franke sink and turn it into the ultimate multi-purpose workstation.

Sink accessories

Heat and sound insulation

Waste disposal units

Kitchen solutions
Everything in the kitchen should flow smoothly, not just the tap. That’s why we create products to make your life easier in the kitchen and that help to maintain a tidy working environment.

The inset waste bin sits neatly in the countertop so food waste can be quickly and hygienically disposed of, while maintaining a minimalist look, and the Franke waste sorter range has multiple solutions to aid in the environmentally friendly disposal of waste.
Choose your perfect sink

As the kitchen sink is seen as the heart of the kitchen, it’s the perfect starting point for creating your dream kitchen. Let your imagination run free with a range of fabulous options to help you maximise space and accentuate the look of the entire room. There are however certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your kitchen.

Inset sinks
Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

Undermount sinks
Undermount sinks are installed underneath the worksurface and therefore require a solid surface worktop such as granite or wood. They are not compatible with laminate worksurfaces.

Belfast sinks
Belfast sinks can be used as either a freestanding feature with brackets or sit on top of base units.

Measuring your cabinet width
It is essential to correctly measure the cabinet width where your sink will be installed. The bowl (or bowls) will need to fit into this space. Each sink in this brochure will show a cabinet size, and your cabinet width needs to be equal to or greater than the stated measurement.

Bowl and drainer configuration
The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of 2 separate working bowls.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer – with the drainer on the left or right hand side. Conversely, other sinks are reversible which indicates the drainer can be positioned on either side.

Franke More in Store
We believe that the best place to buy our products is in store. That’s because you get a friendly face to listen to and offer expert advice. You also get an unrivalled opportunity to see and feel the quality of Franke for yourself.

That’s why we created More in Store, an initiative to support our retailers in giving you great service and the best possible buying experience. What it means for you is more choice, better quality, more knowledge and unbeatable after sales support.

Find your nearest Franke retailer by using the Dealer Locator at www.franke.co.uk/dealers
Material and finish options

Everyone has a different vision of what would make their kitchen wonderful, and that often begins with how they intend to use it. The demands on your sink will dictate which material is right for your kitchen, as each precision-engineered material has individual character and unique benefits. Our range covers everything from the latest trends to traditional favourites, so all you have to do is pick the one that best fits with your cooking style, your lifestyle and your personal taste.

Fragranite treated with Sanitized®

Fragranite is an exceptionally tough material which is highly resistant to burns, dents, chips and stains. It was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%.

Fragranite is available in a range of colours:

- Polar White
- Coffee
- Oyster
- Stone Grey
- Graphite
- Onyx
- Matt Black
- Sage Grey
- Monochrome
- Orion Grey
- Monochrome
- Denim Grey

Active biocidal substance: silver ions. The silver ion locates the bacteria via the moisture and deactivates it.

Stainless Steel

Franke stainless steel sinks are made from premium quality chrome nickel steel, which look stunningly beautiful and is highly resistant to staining, rust and corrosion - plus it won’t chip, craze, flake or break. It’s the most popular material – and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

Franke offers sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finish, which give a more matt sheen, there is a stainless steel solution for you.

Ceramic sinks have been a popular choice for years and combine well with a variety of work surfaces such as wood, glass and granite. Ceramic sinks have a smooth, impervious surface, which is resistant to all standard household chemicals. It’s a very hardwearing choice that stands up to heat, staining and impacts with ease.

Tectonite

Exceptional resistance to heat, shock and impact, coupled with unique design freedom makes Tectonite sinks the ultimate choice for hardworking, stylish kitchens. New technology represents a giant leap forward for synthetic materials, whilst allowing for exciting minimalist designs in the most popular colour options.

Note: Stainless Steel as a material is not scratch resistant. The more it gets used, a patina will develop over time.
Taps worth talking about

Explore endless shape, line and contour possibilities to make an ordinary kitchen something special. The Franke tap range provides your kitchen with a focal point – and in some cases, a talking point. Featuring cutting edge design and a whole host of innovative features to enhance your lifestyle – from filtered cold water, to Instant Boiling Water – the range spans the entire spectrum of form and function.

Instant boiling water taps
Get instant 100°C water at your fingertips, straight from your kitchen tap, with Franke boiling water taps. Perfect for making drinks or getting meals underway in a flash, they combine safety, stylish design and cutting-edge technology.

Mixer taps
Our wonderful range spans the entire spectrum of design, from traditional bridge taps to the chic practicality of a chef’s style tap. Many have features to simplify meal preparation and kitchen tasks so that the everyday can become wonderful.

Filtered water taps
Our Vital and FilterFlow taps deliver hot, cold and filtered water in high style. No need to buy bottled water and you can even do your bit for the environment.

Tap flow rates explained
Before choosing your Franke tap it is essential to check whether you have a high or low pressure water system.

If your property has a low pressure water system you will need to check the flow rating of the taps before you make a purchase. If you install a tap with a low flow rating into a low pressure water system you may be disappointed with the flow of water from your tap. In these instances it will be difficult to achieve a suitable mixed flow of water through the tap as the cold mains water is delivered at a higher pressure and will overpower the weaker hot water pressure.

If you have a high pressure system in your home, such as a combi-boiler or pumped system, you should be able to choose from the full range of taps in our range. We strongly recommend that your plumber or installer checks the water pressure in your home before making a purchase.

Low pressure
(Gravity-fed system)
You have a cold water tank in your attic and a hot water tank in your airing cupboard. You should choose taps which state they are suitable for a low pressure system.

High pressure
(Combi-boiler system)
You have a boiler unit but no hot water cylinder. The boiler unit is usually found in the kitchen and delivers hot water on demand. You should be able to choose from most of our taps.

High pressure
(Pumped system)
You have a hot water cylinder with an expansion vessel on top (often called Megaflo), usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.

This symbol indicates the tap will work with a low pressure system, delivering at least 4 litres per minute of hot water at 0.3 bar pressure.
The newly transformed Mythos Plus sinks combine both design and functionality, thanks to an elegant R10 corner radius and stylish rounded waste cover which sits flush with the sink. The modern and warm design combined with distinctive product features make these products desirable for anyone looking for a top of the range Stainless Steel Franke sink. If you have a flair for cooking, why not take a look at the Mythos Plus accessories to really create a workstation fit for a professional chef!

All sinks come with a 50 year guarantee against manufacturing defects, so you can have peace of mind these products are here to stay!

Durable, versatile Fragranite offers a host of practical and aesthetic benefits. The surface’s rich colour will not stain, mark or fade over time. Plus being heat, impact and scratch-resistant, it’s perfect for busy family homes. What’s more Fragranite’s Sanitized® coating reduces bacteria and microbe growth by 99%, helping keep your sink hygienic and clean.

Similarly, Tectonite sinks have a unique texture and granite-like appearance and are available in a range of colours. Heat resistant up to 300°C, Tectonite’s coated surface is protected against stains and bacteria.

**Ceramic Inset Sinks**

Ceramic sinks combine beautifully with a variety of work surfaces such as wood, glass and granite. It’s no wonder they have been a popular choice for years and their smooth, impervious surface is resistant to all standard household chemicals, making them perfect for modern, hardworking kitchens. It’s a durable choice that stands up to heat, staining and impact with ease; so there’s much more to ceramic than silky smooth good looks.
**Elba Ceramic sink**

- Ceramic sink measurements may vary +/- 1% due to the firing process.

Stainless Steel
Undermount Sinks

It’s your kitchen, so why should you compromise on style or performance? Stainless steel undermounts are particularly easy to clean and exceptionally durable, so luckily you don’t have to.

They give a flawless, uninterrupted look to your kitchen and for solid work surfaces such as granite and wood, a stainless steel undermount sink clips directly underneath the surface to provide a work area that is practical and hygienic. These sinks not only look beautiful, but are resistant to staining, chipping, rust and corrosion.

With a long history as the world’s premium brand in kitchen sinks, you can be confident that you are buying a quality product with premium features. In fact, we are so confident about the quality of manufacture that we offer a 50-year guarantee on all Franke sinks.

Please note: The majority of 1.5 bowl sinks have a template which gives a flange reveal to accommodate accessories. We recommend that you speak to your worktop fabricator to ensure whether or not this is required.

Fragranite & Ceramic Undermount Sinks

Wonderful spaces should simply flow. With undermount sinks, there is nothing to break the smooth flow of your solid granite or wood worksurface. A granite undermount sink provides a subtle complement to your kitchen design. Alternatively, create a bold contrast to granite surfaces with the striking look of a ceramic sink or add a splash of colour with hard, durable Tectonite. Either option represents a hardwearing choice that turns a kitchen into a work area that’s a pleasure to be in.

Please note: The majority of 1.5 bowl sinks have a template which gives a flange reveal to accommodate accessories. We recommend that you speak to your worktop fabricator to ensure whether or not this is required.

Please note: We would recommend that side lever or top lever style taps are fitted with this sink, given the position of the tap platform.

CERAMIC
Gloss White

Made with fire
Ceramic by Franke is
FIRED FOR 20 HOURS
in a tunnel kiln at
VERY HIGH TEMPERATURES.
This process creates an
EXTREMELY HARD SURFACE,
scratch-resistant, HEAT-PROOF AND
impervious to acids and bleaches.
With kitchen design playing a key role in home improvement, the future of the kitchen has arrived with the introduction of instant boiling water taps. Franke Boiling Water taps offer hot, cold and instant 100°C boiling water to save time, energy and water in a single stylish, convenient and space-saving unit.

You can now cook vegetables, create pasta dishes, sterilise babies bottles and make tea or coffee quicker than ever before with 100°C boiling water available instantly. Most ‘boiling’ tap systems only produce less than 98°C so hot drinks don’t taste as good as they should.

Please check your domestic water pressure in relation to the tap operating pressure before purchase.

Each filter lasts around 6-9 months and replacing the filter is as easy as changing a lightbulb.

The Franke instant boiling water taps deliver fully boiling 100°C water instantly for the perfect cuppa.

It is important that you change your filter regularly to keep the water free of impurities and fresh to drink. This will also protect the system from harmful debris and deposits.
Minerva 4-in-1 Electronic Range

The electronically controlled Minerva 4-in-1 tap delivers 100°C boiling, warm, cold or cold filtered water in an instant.

The Minerva 4-in-1 Electronic features the M-Box

For a faster, flawless installation our popular Minerva 4-in-1 taps now feature the new Franke M-Box. Incorporating a Franke Pro M filter, inlet combination, mixing valve set, gasket set and control box in a single unit, the M-Box tidies pipework and allows for horizontal or vertical installation in as little as 20 minutes.

Pressing in the electronic dial wakes the tap from its safety standby mode when the dial glows white. For 100°C boiling water, select the red light and pressing the dial in twice will automatically dispense 30 seconds worth of water, enough to fill a pan, press three times for 60 seconds. Select blue for cold filtered water and a double press of the dial will dispense cold filtered water for 15 seconds, press three times for 30 seconds. The flow of water in each case can also be controlled manually by turning and holding the dial to give more or less water than the pre-set options. The user can select which mode best suits the task in hand.

3 NEW COLOURS

Make a statement in your kitchen with one of our three new colours. The taps are solid stainless steel with a long lasting coating keeping the structure of the stainless steel visible. Will you choose the tough Industrial Black, the stand out Champagne Gold or the on-trend Copper? With a choice of 2 models; Mondial L Spout or Helix J Spout, there is always a tap that fits your kitchen style.

Minerva 4-in-1 Electronic

- Electronic touch control
- Dispenses 100°C boiling, cold filtered, hot and cold water
- 5L horizontal tank can be fitted vertically or horizontally
- Easy to install
- 2 year working parts guarantee
- 2 year finish and O-ring guarantee
Omni 4-in-1 Range

Omni 4-in-1 delivers not only hot and cold mains water but also cold filtered and 100°C boiling water. Omni delivers beautifully pure, fresh tasting water, so there’s no need for expensive bottled water. Omni is easy to fit in new or existing kitchens, safe to use and ultra reliable with a 3-year guarantee. Best of all, it’s refreshingly affordable.

4-in-1 technology
Omni is the world’s first mechanical 4-in-1 kitchen mixer tap, offering filtered boiling and filtered cold water, as well as the usual mains hot and cold.

Minimal maintenance
Omni is a complete system, including tap, boiler and under sink filter. The filter provides high quality drinking water and also protects the boiler from limescale build-up. Each filter lasts around 6 - 9 months and replacing the filter is as easy as changing a lightbulb.

True 100°C boiling water
Most ‘boiling’ tap systems only produce less than 98°C so hot drinks don’t taste as good as they should. Omni delivers fully boiling 100°C water instantly for the perfect cuppa.

Easy installation
Virtually no tools and minimal plumbing skills are required for installation.

Safety assured
Omni is safer than a traditional kettle in so many ways; there are no cords which can be pulled to avoid any nasty accidents as on a kettle. The childproof push-to-activate lever helps to keep boiling water away from little hands. The lever is also spring loaded to switch off instantly if any splashes occur.

A child safety clip is provided for total protection from curious little hands or visitors to your home. All this and the patented chassis engineering means the tap is never too hot to the touch. It stays cool even when producing boiling water.

A full 3-year guarantee for total reliability
A 3-year manufacturer’s guarantee covers the complete system for your total peace of mind.

Exceptional aftercare
Our UK based advisors are always on hand to help. Filters tell you when they need replacing, and replacements are easy to order by phone or online.

Minerva 3-in-1 Range

The Minerva 3-in-1 tap provides hot, cold and 100°C boiling water. The humble kitchen tap is transformed into a space-saving, time-saving helper with this boiling water tap and there are 3 stylish designs to choose from.

Safety is assured with a two-step safety handle, while the fully insulated spout and handle ensure that they both stay cool to the touch. The Minerva system features a space-saving water tank that fits discreetly into your kitchen so that boiling water is always ready when you need it.

Discreet and suitable for almost any kitchen, the horizontal heating tank sits neatly behind a standard 150mm cabinet plinth, freeing up much-needed cupboard space. Those who have chosen Minerva in their kitchen have found it not only provides a stylish and functional addition to their home, but is also a real talking point.

Please note: The Franke Minerva range of taps require a minimum water pressure of 1.5 bar hot and 1.5 bar cold to function correctly. Please consult your plumber or installer before purchase.

FilterFlow Taps

The stylish and superbly engineered FilterFlow range is the blueprint for multi-tasking kitchen taps. Having filtered water at your fingertips means no more cumbersome, expensive bottled water, and naturally, there is the peace of mind of knowing your family’s drinking water is clean, refreshing and free of impurities. Franke FilterFlow taps remove a wide range of impurities, including chlorine, organic matter, chemical and pharmaceutical traces, metallics and sediment.

What about the things that are good for you?

The FilterFlow tap won’t remove minerals and desirable elements such as calcium, magnesium and fluoride. These are dissolved in the water and no part of the filtration process removes these from the water. They remain intact – and help to ensure your water is as healthy as it is refreshing.

Please note: Franke FilterFlow taps require a minimum water pressure of 1 bar (hot and cold). Be sure to ask a qualified installer to check your home’s plumbing system and water pressure before purchase.

Franke FilterFlow

Playing our part in reducing plastics free refillable water flasks with selected Franke taps.

The amount of plastic going into landfill is an ever-increasing problem. And each year more than 8 million tonnes of plastic finds its way into our oceans - polluting the water, affecting marine life and, in turn, impacting on the food chain and our overall health. One of the biggest contributors to this problem is single use plastic water bottles.

Why not play your part by switching to a sustainable refillable water bottle? We can all help to reduce the impact plastic is having on the planet.

How do FilterFlow taps work?

Franke FilterFlow taps are connected to a compact filter system that is fitted below the sink. When you select the tap’s third lever, cold water is diverted through the filter system. The system’s filter cartridge removes contaminants before the freshly filtered water travels back through a dedicated waterway inside the tap’s spout.

The filtration process

FilterFlow filter cartridges provide a unique and highly effective two-stage filtration process. The cartridges feature an outer ceramic shell and an inner carbon core. The fine ceramic has the ability to trap even the most microscopic of impurities, down to sub-micron level. The activated carbon core is manufactured from solid carbon rod, and eliminates contaminants such as chlorine and heavy metals, as well as unpleasant odours.

Which impurities does a FilterFlow tap remove?

Franke FilterFlow taps will remove a wide range of impurities, including chlorine and chloramine – which you can often smell in tap water – organic matter, chemical and pharmaceutical traces, metallics and sediment. Importantly, a FilterFlow tap also has the capacity to remove harmful, sickness inducing bacteria, if it is present.

Technical essentials

On average, a Franke FilterFlow tap will deliver around 2,500 litres of filtered water before its filter cartridge will need changing. And that couldn’t be simpler. It’s a 1-2-3 operation and as easy as changing a light bulb.

---

The stakes are high... and VERY SOON we will have reached the point of NO RETURN.

It's time to make a Vital change and put our WONDERFUL PLANET FIRST.
The Vital Capsule Filter System

The easiest way to enjoy filtered water. It delivers the most wonderful tap water you’ve ever tasted. Developed in Switzerland, it’s the most advanced water filter system in the world.

Our water filter is not only the smallest in the world, but also the first to combine activated carbon with a bionic membrane. The flow of water from the filter straight into the glass and the combination of activated carbon and a high-tech membrane ensure supreme water quality. The filter removes bacteria, viruses, pesticides, hormones and microplastics. Not only does tap water taste better, it is also much healthier.

The Franke Vital Capsule taps look stunning in any kitchen. The system is so compact that no complicated installation under the sink is required. An iconic space-saving design is available in various designs and colours. Simply order capsules conveniently online and enjoy fresh water day after day.

Modelled on nature, developed in Switzerland.

Franke Tap Range

We place huge importance on creating products that stand the test of time and make your kitchen a more wonderful place to cook and entertain. From extravagant to purist. From SilkSteel finish to polished Chrome or Solid Stainless Steel. Whether you prefer a flexible, pull-out spray or directional nozzle, the Franke tap range meets every need in every kitchen. Your favourite Franke tap will be the perfect complement to your ideal Franke sink. Designed for a discerning clientele, this collection has styles and attributes to meet every taste. Franke is so confident of the quality and manufacture of these models, that we guarantee them between 2 - 5 years on the finish and 5 years on internal working parts.

NEW Atlas Neo Sensor

The Atlas Neo Sensor tap is made of Solid Stainless Steel which has a hygienic, non-porous surface that is resistant to bacteria and germs. Once in use, the water will flow continuously for 30 seconds so no need to worry about flooding if the water is left running unsupervised. The tap can be stopped with a wave, as well as started so, you don’t have to wait 30 seconds.

• Hybrid function enabling manual lever for everyday use and sensor activity for hand washing.
• The touchless and manual controls operate independently from each other.
• The sensor screen is easy to keep clean and easy to use.
• The sensor controls the touch free water temperature.
• If unintentionally started and once activated, the water flow stops in less than a second!
• The temperature on the sensor is set upon installation in the control box under the sink.
• Quick and easy plug-in installation: the tap, the control box, and the battery.

Franke innovation doesn’t end with sinks and taps.

We strive to make your life easier in every aspect of your kitchen with a range of convenient and practical kitchen solutions. From dealing with unsightly household waste in a hygienic manner to effortlessly sorting waste for recycling, they are designed to save time and to incorporate kitchen essentials discreetly into kitchen units, so that you can maintain a clean, uncluttered kitchen.

**Tap Brace**
- Connects the tap to the worktop for extra support
- Variable collar fits any model of tap
- Can be used on any stainless steel inset sink

**Waste Bin**
- Inset stainless steel system
- 12 litre polyethylene container
- Sits flush with worktop
- Cover keeps odours sealed inside

Franke Waste Sorter Bins

Fitting neatly into most standard cabinets, Franke Waste Sorters feature separate plastic containers to sort domestic waste into different categories such as food, cans, plastic and paper. A lid closes over the bins to contain any odours. Franke Waste Sorters are the convenient alternative to the conventional waste bin.

Standard door systems

The Franke 300 Series Sorter Systems are a useful addition to any kitchen with standard doors, fitting neatly into 450mm and 600mm kitchen base units. Each bin has a handle that can also be used to secure waste bags. The roll-out carrier is fully waterproof, simple to dismantle and easy to clean.

Sorter 300-45 Duo

- Cabinet width 450mm
- 2 x 22L bin

Price

300-45 Duo £324

Sorter 300-45 Trio

- Cabinet width 450mm
- 1 x 22L bin and 2 x 10L bin

Price

300-45 Trio £338

Sorter 300-60 Duo

- Cabinet width 600mm
- 2 x 22L bin

Price

300-60 Duo £338

Sorter 300-60 Trio

- Cabinet width 600mm
- 1 x 22L bin and 2 x 10L bin

Price

300-60 Trio £351

Franke Waste Disposal Units

A choice of five waste disposal units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate. Thanks to a permanent magnet motor, Franke Turbo Elite Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.
A waste disposal unit can be a wonderful addition to any kitchen. And by following our advice on what you can and cannot put down them, you can keep your disposer in good working order.

Waste disposal units are designed to deal with small amounts of organic waste such as fruit and vegetable peelings, small bones from fish and chicken, coffee grounds, pips and seeds, nutshells, eggshells, rice and leftover meat. But to prevent any problems, avoid putting teabags, seafood shells, corn cobs, banana skins, pineapple leaves or metal, glass, plastic and paper down it. Plus, to keep things smelling clean and fresh, don’t use drain cleaner – instead squirt a few drops of lemon juice in there.

**Waste Disposal Unit**

**Turbo Elite TE-50**

- **Feed**: Continuous
- **Motor Horsepower**: 0.5 HP
- **Motor Speed RPM**: 2600
- **Motor Type**: High Torque Dual Magnetic
- **Air Switch**: Integral
- **Mounting System**: Professional 3-bolt
- **Warranty**: 10 Years

**Price**: £319

**Waste Disposal Unit**

**Turbo Elite TE-75**

NB. Ensure WDU dimensions can be accommodated within the specified cabinet width.

Image shows KNG 110-52 Polar White Sink with an Atlas Neo tap.

All prices are inclusive of VAT.
Colours shown are for reference only. All sinks available with left or right hand drainer. The description ‘reversible’ means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a ‘handed’ sink it is necessary to specify which side the drainer is required, eg MRX 251 left hand drainer or MRX 251 right hand drainer. All bowls sizes and dimensions are described in mm.

Franke sinks are guaranteed against manufacturing defect for 50 years. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings, ‘O’ rings and finishes (5 years for stainless steel taps), and 5 years in relation to valve mechanisms and working parts. Franke will replace (and where appropriate repair) defective areas. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights. For full details see www.franke.co.uk/guarantee.

Prices shown are UK mainland prices effective from 1st OCTOBER 2021 and include VAT at the current rate of 20%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. E & OE.

Front cover shows Icon Pull Out Double Jet Shower tap in Matt Black.

Image shows Mythos MYX 110-45 with a Matt Black Icon Swivel Spout tap.
