Make it Wonderful

MAKE IT WONDERFUL

FRANKE VITAL CAPSULE FILTER SYSTEM
The easiest way to enjoy filtered water

Thanks to the patented filter technology, the Franke Vital Capsule Filter System delivers refreshing drinking water more simply, quickly and reliably than ever before. It delivers the most wonderful tap water you’ve ever tasted. Developed in Switzerland, simple to use and impeccably designed, it’s the most advanced water filter system in the world.

Where the magic happens

The best water filter in the world is also the smallest. That’s something of a marvel, given what’s inside. It is the first system ever to combine activated carbon with a high-tech membrane and turns 500 litres of tap water into pure refreshment.

Quality and Performance

made in Switzerland
HYGENIC & SAFE
The flow of water from the filter straight into the glass and the combination of activated carbon and a high-tech membrane ensure supreme water quality. The filter removes bacteria, viruses, pesticides, hormones and microplastics. Not only does tap water taste better, it is also much healthier.

CONVENIENT & EASY TO USE
The system is so compact that no complicated installation under the sink is required. Simply order capsules conveniently online and enjoy superb water day after day.

STYLISH & ICONIC
The Franke Vital Capsule tap look stunning in any kitchen. An iconic space-saving design, available in various designs and colours.
Our water filter is not only the smallest in the world, but also the first to combine activated carbon with a bionic membrane. Modelled on nature, developed in Switzerland.

1. PRE-FILTER
The pre-filter is the first line of defence, eliminating coarse contamination. Larger particles are filtered out and captured.

2. MEMBRANE
Nanotechnology makes it possible: the 0.06 mm thick membrane, enclosed in a fine nylon mesh, filters even bacteria from your drinking water.

3. ACTIVATED CARBON FILTER
Activated carbon removes dissolved impurities (e.g. chlorine) and impurities. The underlying technology is a natural physical process that has been proven over decades.

4. WATER FLOW
First through the pre-filter, then through the membrane, finally through the activated carbon and filtered straight into the glass. The Vital Capsule prevents cross contamination between filtered and unfiltered water.

REORDERING
When the LED light turns red, this is an indication that the filter has to be changed. New filter capsules can simply be reordered online via: central-servicesuk.co.uk
FILLED WITH MANY ADVANTAGES

- Removes 99.9% of bacteria
- Removes 99% of viruses
- Filters out rust and sediments
- Filters out microplastics
- Removes tastes and odours
- Highest quality filtered water
- Simple to use
- Filters up to 500 L (132 gal)
- Hygienic
- Easy to install
- No tools needed

PARAMETER          VALUE
Flow rate          3.5 L/min at 3 bar
Temperature range  5 – 65 °C (41 – 149 °F)
Pressure range     0.7 – 6.8 bar
                    (10 – 100 psi)
Capacity           500 L (132 gal)
MEET THE FAMILY

VITAL CAPSULE 3-IN-1 FILTER TAP J-SPOUT
The Classic and timeless design. Rotates 360° for maximum freedom and flexibility. This model also has a Perlator for a champagne like flow.

VITAL CAPSULE 2-IN-1 FILTER TAP SINGLE DISPENSE
The Compact. Minimalist, elegant, fully rotatable: the easiest way to enjoy fresh drinking water every day.
