

Hoods features

MOTORS & FILTERS

Charcoal Filters: Choose the correct filter for your hood, if it is to be used in recirculatory mode

Types of the motor: Denotes the motor type within the hood.

 **Filtering Function:** Can be installed where no external flue is available,

 **Filter Saturation Indicator:** Indicator light shows when the filter requires maintenance.

FEATURES

Sound Insulation: Indicates the noise level produced by the hood.

 **Extraction Speed Settings:** Motor speed settings. Some models also have an intensive setting for short bursts of extraction when required.

 **Perimetric Extraction:** Offers superior efficiency where air flows around the perimeter of the hood panels.

 **Continuous 24 Hour Ventilation:** Provides a constant flow of clean air through the kitchen.

 **Anti-condensation Technology:** Heated glass to prevent condensation.

 **Easy-Fit System:** Installation is simple with this innovative mounting system.

ADDITIONAL FEATURES

 **Digital Display:** Illuminated digital display featured on some electronic and touch control models.

 **Comfort Light:** Provides subtle ambient light in the kitchen.

 **Remote Control:** Denotes a model where a remote control operating unit is optional.

 **Automatic Cut Off Timer:** A useful feature is you want to leave the hood running a short while after leaving the kitchen.

 **Greenline Technology:** up to 85% energy saving versus a standard motor.

GUARANTEE

 **24 Months:** A 24 month guarantee covering parts and labour on all Franke hoods offers complete peace of mind.
