

PRESS RELEASE**Date: AUGUST 2016****Get the beauty of ceramic in a sleek, modern design with Franke's new Kubus ceramic undermount sinks**

If you appreciate ceramic as a material and wish to use it in a modern, streamlined kitchen design take a look at the three new Kubus ceramic undermount sinks from Franke's Specialist range.

The silky-smooth gloss ceramic combines perfectly with a variety of worktop materials including wood, glass and granite to give the worksurface an ultra-sleek finish.

Two single bowl models and a fully reversible 1.5 bowl model (pictured) are now available in white to fit either a 500mm or 600mm cabinet, with the assurance of a 50 year guarantee against manufacturing defect.

Franke ceramic sinks are really easy to clean and the surface is hardwearing too, standing up to heat, staining and impact and being resistant to all standard household chemicals.

The Kubus ceramic undermount sinks are compatible with Franke's handy Rollamat, ideal for use either as a drainer or as a heat-resistant mat for hot pans, plus all three models can be fitted with a Franke waste disposal unit for added convenience.
