

PLANOX WASHTROUGHS

The new Planox range of washtroughs offers a functional, easy-to-clean and user-friendly solution whilst ensuring optimum hygiene. The troughs are seamlessly welded using an innovative robotic laser, making them highly resistant to dirt and bacteria. The 1cm lowered tap ledge prevents water spilling on to the floor.

Manufactured from 1.4301 (304) stainless steel with 0.8 mm trough and 1.2mm side panels. The range includes products with various lengths from 600mm to 3,000mm, with or without tap holes and ledge, with or without splashback. All the products include a 38mm central domed strainer waste, and integrated bracket.
