FRANKE

SOLID SURFACE BABY CHANGE AND BABY BATH UNITS

Make it wonderful with Franke

Franke supplies top-quality and down-to earth products that accompany us in our daily lives which are subject to wear and tear. These frequently used everyday products need to be durable and reliable. Franke strive to produce these everyday objects which are a little less ordinary, by making them more beautiful and better quality.

That's what Make It Wonderful stands for, and our brand promise. It means in that, whether you are a business partner or an end user, we want to make your everyday life a little less ordinary and a little more wonderful.

Wonderful baby changing units

Made from Miranit composite material, the clean lines and stylish designs of the Franke solid surface baby change units and baths come in a range of sizes and shapes to fit a variety of environments and design tastes. This hard-wearing stylish material is perfect for all project types and sizes, from nurseries to supermarkets and airports.

Miranit is manufactured from 80% natural minerals such as marble, sandstone and quartz sand and approximately 20% high-quality unsaturated polyester resin, making it particularly robust and long lasting. As Miranit is a poured material it is manufactured using a single mould creating a finished product without any adhesive seams or joints. This makes it much more flexible and hygienic than other composite materials on the market which are either formed from sheets or casts. Choose from a single changing or bath unit or incorporate one of Franke's Varius basins, with over twenty different options it is possible to create any style, colour or shape!

Whatever the budget, Franke has the capacity to deliver any size project. The in-house design team can work with you to put together a solution based on your specification requirements, giving you the flexibility to create a completely customised product and solution.

Creating your design

You can create your custom designs by completing one of the form on pages 4-5 and the form on page 6 with your contact details. The form consists of specifications that you will need to complete in order for us to assess and create your design including; material finish, number of bowls and spacing required, placement and more. Follow the steps below in order to help complete your desired specification.

How to order

Step 1. Select specification including length, depth, bowl type and accessories

Step 2. Fill out your details on page 6

Step 4. Once the form is completed, please submit to your local Franke Water Systems stockist for review

Step 5. We will create your design and submit for approval before manufacture

NB - Drawings will be submitted for approval before manufacture commences. Lead times are approx. 5 weeks from sign off of drawings depending on requirements.

Pre-sales support and bespoke designs

If you have a large project with various bespoke products and are unsure of what to specify, please get in touch with our pre-sales team. The support staff can offer product advice and support on special products so you can achieve your specification and budget requirements.

For more information and advice call 01246 458900 or email ws-info.uk@franke.com. Alternatively you can go online and book an appointment with one of Franke's experienced Specification Sales Managers who are happy to help and offer you support.

ORDER FORM
