Installation and User Guide
ATM, ATO, ATT 400 Series
Congratulations on the purchase of your Atriflo Kitchen Faucet. Correctly installed and with sensible care, it will give many years of trouble free service.

Before you proceed... We recommend you engage the services of a registered plumber to install this product.

Read the instructions and diagrams in this leaflet carefully.

Preparation:
This range of Atriflo kitchen faucets features a spout that allows hot and cold water to mix before discharge.

1) Flush the plumbing system before installing the faucet. This is to avoid plumbing residues clogging the aerator, or possibly damaging the ceramic valves. This is especially important where extensive plumbing work has been carried out.

Check List
- Temperature of the hot water supply does not exceed 185°F.
- Recommended minimum water supply pressure - 15psi.
- Recommended maximum water supply pressure - 100psi.
- Ideal performance obtained with equal hot & cold pressures.

Oberon, Mimas & Titan Centerbody Assembly - Refer to Figure 1.

2) Oberon - Hot supply should be on the left when viewed from the front of the fitting.

3) Mimas - Lever should be on the right when viewed from the front of the fitting. Hole center a minimum distance of 21/4" from wall.

4) Monobloc mixers and Titan centerbody require a 1 3/8" diameter hole through the surface they are to be installed on. Maximum countertop thickness 1 3/4".

5) Insert the flexible connections through the hole ensuring that the base seal is in place between the mixer and mounting surface.

6) From the underside of the counter top, place the clamp plate on securing stud and using the box spanner supplied, put fixing nut in spanner and tighten until mixer is held firmly in position. See Figure 1.

Titan Sidevalve Assembly - Refer to Figure 4.

7) The side valve assemblies require a 1 1/8" diameter hole through the counter surface.

8) Undo and remove cover, handle, rosette and base seal. Screw backnut and washer fully onto side valve shank.

9) From underside pass shank through the hole in the counter top and screw rosette with base seal onto shank until the thread can be seen above the rosette.

10) Ensure the connection for flexible hose is facing the nozzle and tighten backnut and fiber washer up to the underside of the counter top by hand to stop sidevalve from rotating.

11) Connect flexible hose from nozzle to sidevalve outlet. Screw the cover and handle onto the sidevalve ensuring that the handle is correctly aligned. If not, remove and turn the plastic vernier insert a few splines until the correct alignment has been achieved.

12) Unscrew the rosette until it meets the cover and fully tighten backnut and fiber washer up to underside of counter top.

13) Connect the Hot & Cold water supplies to the side valve inlets. See Figure 4.

14) Important - Check that flexible hoses are not twisted or kinked as this will restrict the flow.

Rinse Assembly - Refer to Figure 2.

15) The rinse units require a 1 1/8" diameter hole through the surface they are to be installed on.

16) Assemble rinse unit socket to the counter top ensuring the base seal is in place under body and the fiber seal is above the backnut.

17) Thread the tapered end of the rinse flex to the Rinse unit ensuring the rubber seal is in place between them.

18) Pass the other end of the flex down through the socket, and screw the externally threaded end to the remaining hose at the base of the faucet. See Figure 2.
Franke Atriflo
Installation / Care & Maintenance

Figure 2. Installation of Oberon Faucet

Before Use
Turn on the Hot and Cold supplies to the faucet.

Carefully check the installation for leaks.

If further building work is to be carried out in the vicinity, cover the mixer tap with a plastic bag to avoid damaging the finish.

Please ensure that the installation complies with the local plumbing codes.

Spouts are fitted with a flow regulated aerator.

Figure 3. Installation of Mimas Faucet

Operation
Ceramic disc valves are fitted as standard to the Oberon & Titan faucets. Flow from FULLY OFF to FULLY ON is achieved by rotating the handles a quarter turn.

The Mimas mixer temperature is controlled by rotating the lever forwards or backwards, in line with the body of the faucet, to adjust Hot and Cold. The flow of water is increased by pushing the lever towards the body of the faucet.

Figure 4. Installation of Titan Faucet

Care & Maintenance
Occasional cleaning with warm soapy water, followed by a polish with a soft cloth is all that is required to keep the plated finish in good condition.

Do not use proprietary abrasive liquids, powders, or pads to clean the faucet. You will damage the plated finish and void your warranty.

The aerator at the outlet of the spout may need occasional cleaning. To accomplish this unscrew the outlet in a counter-clockwise direction and remove the aerator. Rinse thoroughly in clean water and re-install.
Congratulations on the purchase of a Franke product. Franke is one of the world’s largest manufacturers of kitchen systems. Our products are manufactured using the highest degree of technology quality and design. As a result we are proud to offer the following warranty.

Franke Kitchen Systems Division, warrants the quality of its water dispensing systems to be free from manufacturing defects for a period of five years from the date of purchase.

This warranty applies only to the original owner, providing the product has been installed in accordance with our installation instructions, used as recommended and in a normal residential application. In the event of a warranty claim, the owner will be required to provide proof of purchase. This warranty covers all components necessary to restore the product to good working condition. Franke reserves the right to inspect the installation prior to the replacement of the product or component part. This warranty does not cover misuse or abuse, accidental damage, scuffs or scratches, abnormal usage, negligence or damage caused by improper maintenance or cleaning. Normal wear of parts is excluded from warranty. Damage caused by impurities or acts beyond our control are not covered. Any product or part which has been repaired or altered in any manner outside of Franke’s factory, unless previously authorized in writing by Franke, will void warranty.

Any replacement or repair excludes any transportation and labor costs.

This warranty does not allow recovery of incidental or consequential damages such as loss of use, delay, property damage or other consequential damage, and Franke accepts no liability for such damages.

The Franke warranty is limited to the above condition and to the warranty period specified herein and is exclusive. Franke DISCLAIMS all other warranties, expressed or implied, including the IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE. This warranty gives you specific legal rights which may vary from state to state.
