

PLANOX MULTIPLE WASHTROUGHS

Made with innovative production technology

Seamlessly welded for extraordinary standards of hygiene

With the new PLANOX product line, Franke offers functional, easy-to-clean and user-friendly multiple washtroughs that set new hygiene standards under the toughest conditions.

The newly designed PLANOX products are seamlessly welded using an innovative robot laser welding process, thereby giving dirt and bacteria no chance of gaining a foothold on flat surfaces.

PLANOX guarantees optimum flexibility for designers and customers. This is ensured with the central waste and the seven most common standard lengths. You can also effortlessly create special lengths of up to three metres.

Combined with the Franke Water Systems taps the PLANOX washtroughs can be designed and installed to create a complete washroom that meets any specification or requirement.

FRANKE

PLANOX MULTIPLE WASHTROUGHS

Made with innovative production technology

CE

The new PLANOX multiple washtroughs product line for ...

- **Highest hygiene standards:** seamlessly welded from the inside
- **Easy and flexible planning:** central waste for all seven standard and special lengths
- **Attractive design:** a contemporary design and a high-quality welded seam – sleek and uniform thanks to the robot laser welding process
- **Ease of cleaning:** inner contours > 90°
- **Excellent draining performance:** optimised gradient and central waste
- **Safety:** rounded outer edges thanks to additional deburred welded seam
- **Dry floors:** lowered tap ledge to prevent splashing water
- **Easy installation:** keyhole fixings and integrated grounding lug
- **Very user-friendly:** improved storage with the wider tap ledge (80 mm) and an optimised inner shape
