

Little Butler Heating Tank

On demand hot water when you need it.

Model: HT-400

Save time and water by eliminating the wait for hot water to reach the faucet. Franke HT-400 Little Butler heating tank fits under your sink to provide precise, instant hot water between 176°F to 208°F right when you need it.

HT-400 Instant Hot Water Tank

- 7 preset temperatures with back-lit dial
- Control temperature from 176°F to 208°F
- Accurate temperature control within +/- 1.0°F
- 1100 W heating element provides a fast recovery
- Produces up to 60 cups of hot water per hour
- Water level sensor and dual temperature sensors prevent the tank from starting up dry
- Encased heating element eliminates direct contact with water, preventing mineral build up
- Stainless steel internal tank
- Industry leading 5 year warranty

FRANKE

Save water

As it takes time to boil water, we usually boil more than we actually need. With the Instant Hot Water Tank you just take the amount of hot water you need.

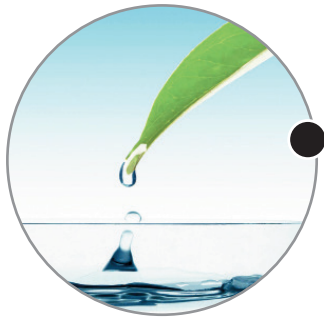

Reduce wait time

To have almost boiling water coming out of your faucet is not only very convenient but time saving. It maintains a consistent and reliable supply of hot water for when you need it.

Energy efficient

Even though the heating tank permanently heats water, it uses less energy throughout the day than a regular light bulb or than boiling a kettle three times a day.

Simplify tasks

Easily remove labels, thaw frozen foods or warm up baby bottles are just a few tasks how on demand hot water can make life easier.
