**FOR IMMEDIATE RELEASE**

**Franke Transforms Tap Water with 3-in-1 Filter Faucets Featuring Bluetooth Technology**

*Drink water from the faucet, and never forget to change the filter; faucets connect to filtration app, monitor filter use and send alerts to users; available Spring 2016*

**LAS VEGAS, NEV.** (January 19, 2016) – Franke, the largest stainless steel kitchen sink manufacturer in the world and a leading name in kitchen faucets, is unveiling the Ambient 3-in-1 Filter Faucet and the EOS 3-in-1 Filter Faucet at the 2016 Kitchen & Bath Industry Show (KBIS) in Las Vegas on January 19-21. The faucets, available for purchase in Spring 2016, produce hot, cold and filtered water all from one faucet. Plus, these 3-in-1 faucets work with Franke’s new filtration app, which monitors usage of filtered water and reminds users when it’s time to replace filters through a Bluetooth connection.

Produced of the highest quality materials, Franke’s 3-in-1 faucets are available in two different models. The Ambient 3-in-1 Filter Faucet, made of low lead brass and available in chrome and satin nickel, features a sleek, slim and modern design. The EOS 3-in-1 Filter Faucet, uniquely made of stainless steel both inside out, is compatible with Franke’s Fast-In Quick Install Sink System. Both faucets are built with dual pipes and aerators to ensure that filtered water and tap water are never in contact.

“Franke’s 3-in-1 faucets have been carefully designed to ensure consumers are drinking the purest water,” said Lars Christensen, Global Product Manager of Faucets for Franke Kitchen Systems. “Not only do the 3-in-1 faucets reduce the expense and eliminate the waste associated with purchasing bottled water, but they remind consumers to change their filter, so the filtered water is always odorless and tastes great.”

**Franke’s 3-in-1 faucets feature:**

- **Bluetooth technology:** Drink water from the faucet, and never forget to change your filter. With Franke’s new Bluetooth-enabled filtration app, once 600 gallons of water pass through the filter, the app will alert you to change your filter and direct you to a local retailer.
- **Five filter cartridges:** Enjoy clean, odorless water on tap. Franke’s five filter cartridges, compatible with one of three filter canister options, feature ceramic outer shells and activated carbon block cores. Plus, they use a multistage filtration process that kills bacteria and rids tap water of chlorine, chloramine and other chemicals – ensuring pure water that tastes great.
- **Chilled water:** Experience chilled drinking water directly from your kitchen faucet with an optional Franke chiller. Quick and easy to install, the chiller’s temperature can be adjusted to produce water directly from your faucet that’s a refreshing 40-degrees.

Franke’s 3-in-1 faucets will be sold exclusively at Franke retailers. For more details and to find a store near you, visit [www.franke.us/ks](http://www.franke.us/ks).
