Franke Wc Pans Are Designed To Reduce Water Consumption By Up To 60%

WC Pans consume up to 90 percent of water usage in commercial buildings. New technology has been introduced to produce a new range that delivers high performance and aesthetically pleasing designs, to compliment the rest of the Franke sanitary ware products. Designed for ultimate hygiene solutions and ease of installation in public ablutions, the range caters for a wide variety of applications, from recreational facilities, shopping centres, petrol stations, airports and stadiums.

Product features:
- Hygienic, quality designs and excellent low water consumption
- Aesthetically pleasing design, with satin finish
- Pressed bowl and P-trap, with minimal welding through robotic welding technology
- Full flush of 4 or 6 litres
- Sturdy design and safety compliant with low maintenance compared with ceramic and composite materials
- Internationally approved accreditation (Refer to accreditations - Page 03)

Plasma Cutting & MIG Welding of WC Pan Assembly

Franke South Africa invested in new technology since 2004 to enhance its export activities into Europe, Australia, New Zealand and Africa.

The new range of Stainless Steel wall hung pans is aesthetically pleasing and no longer limited to security applications.

Stainless Steel does not crack or chip and as such has a low replacement rate. Raised above the floor the new range of wall hung pans facilitates easier cleaning around the pan resulting in improved hygiene.

Each WC pan is pickled and passivated to prevent corrosion on welds.

Quality assurance. Each WC pan is tested to ensure that it complies with international standards. The Franke South Africa factory complies with ISO 9001:2008 Quality Management Standards.

Capital Invested Technology

Enhanced style and finishes have been achieved through a series of investment technologies.

Laser Technology
With the detailed precision, narrowest heat-affected zone and spot-on accuracy produced by advanced laser systems, we can provide the highest quality, intricate and detailed products.

Deep Drawing and Annealing
Deep drawing involves the use of metal dice to form blank sheets of metal into a desired shape thus reducing the need to weld components together. Deep drawing produces products that are significantly stronger and lighter. It also allows for a much smaller risk of error, consistent quality and a more predictable end product in a shorter period of time.

Robot Welding
Robot welding is the use of mechanised programmable tools (robots), which completely automate a welding process by both performing the weld and handling of the part. The automated process that robotic welding brings to steel fabrication provides much higher consistency and repeatability of quality welds. Robotic welding is used to ensure that each Pan conforms with the highest quality standards.

Water Conservation & Quality Assurance

Each Franke WC pan complies with the following SABS standard:
SABS 1733: 2002

Each Franke WC pan complies with the following international standards:
- LGA DIN EN 997: 2008-03: paper removal test
- LGA DIN EN 997: 2008-03: 6 litre flushing test - solids and urine
- LGA DIN EN 997: 2008-03: 4 litre flushing test - solids and urine

WASHROOM ACCESSORIES
Franke have a wide range of Stainless Steel accessories for all applications; hands free, wall mounted and recessed accessories. Our product range includes solid Stainless Steel bathroom accessories, ideally suited for such applications as: hospitals and clinics.

The new Rodan range of accessories, its timeless design with angular side profiles lends itself to the contemporary décor of heavily frequented washrooms and rest rooms.

HANDS FREE ACCESSORIES
Franke always strives to find the ultimate hygiene solutions without compromising quality and durability. The hands free accessories offer a hygienic solution for usage in heavily frequented washrooms, wards and rest rooms. The range includes a sensor operated: soap dispenser, paper towel dispenser and hand dryer.

GRAB RAILS
Franke grab rails offer a secure support, thanks to Franke’s Fine-Grip surface finish, for use in private homes and public, clinical and care sectors.

WATER MANAGEMENT
Complementing the Franke range of accessories, a new range of self closing/sensor operated basin taps and mixers have been added. The taps and mixers are of a heavy duty design to improve hygiene and decrease water consumption in public ablutions.

The range comprises of an electronic sensor operated mixer and self closing taps and mixers.

TRIFLOW WATER PURIFICATION MIXER
Discover the unique advantages and health benefits of the Franke Triflow water filtration system. Designed and fitted with a premium-grade carbon activated cartridge, the Franke Triflow is a health-conscious and quality drinking water filtration system. The Triflow dispenses hot, cold and perfectly filtered drinking water. The filtration system has the ability to filter out chlorides, odours and sedimentation from the water, it however does not ‘strip’ the water of its goodness and retains beneficial minerals such as calcium and magnesium – essential for a healthy diet.

ZIP HYDROBOILS AND CHILLERS
Zip Hydroboils are convenient plumbed-in boiling water systems that deliver instant boiling water 24 hours a day. It is a sealed system to provide ultimate hygiene and low electricity consumption. It is steam free and low maintenance.

Zip chillers are manufactured to provide chilled water under extreme temperatures. The units are plumbed to provide low operating costs, together with convenience.
