HOODS COLLECTION January 2023

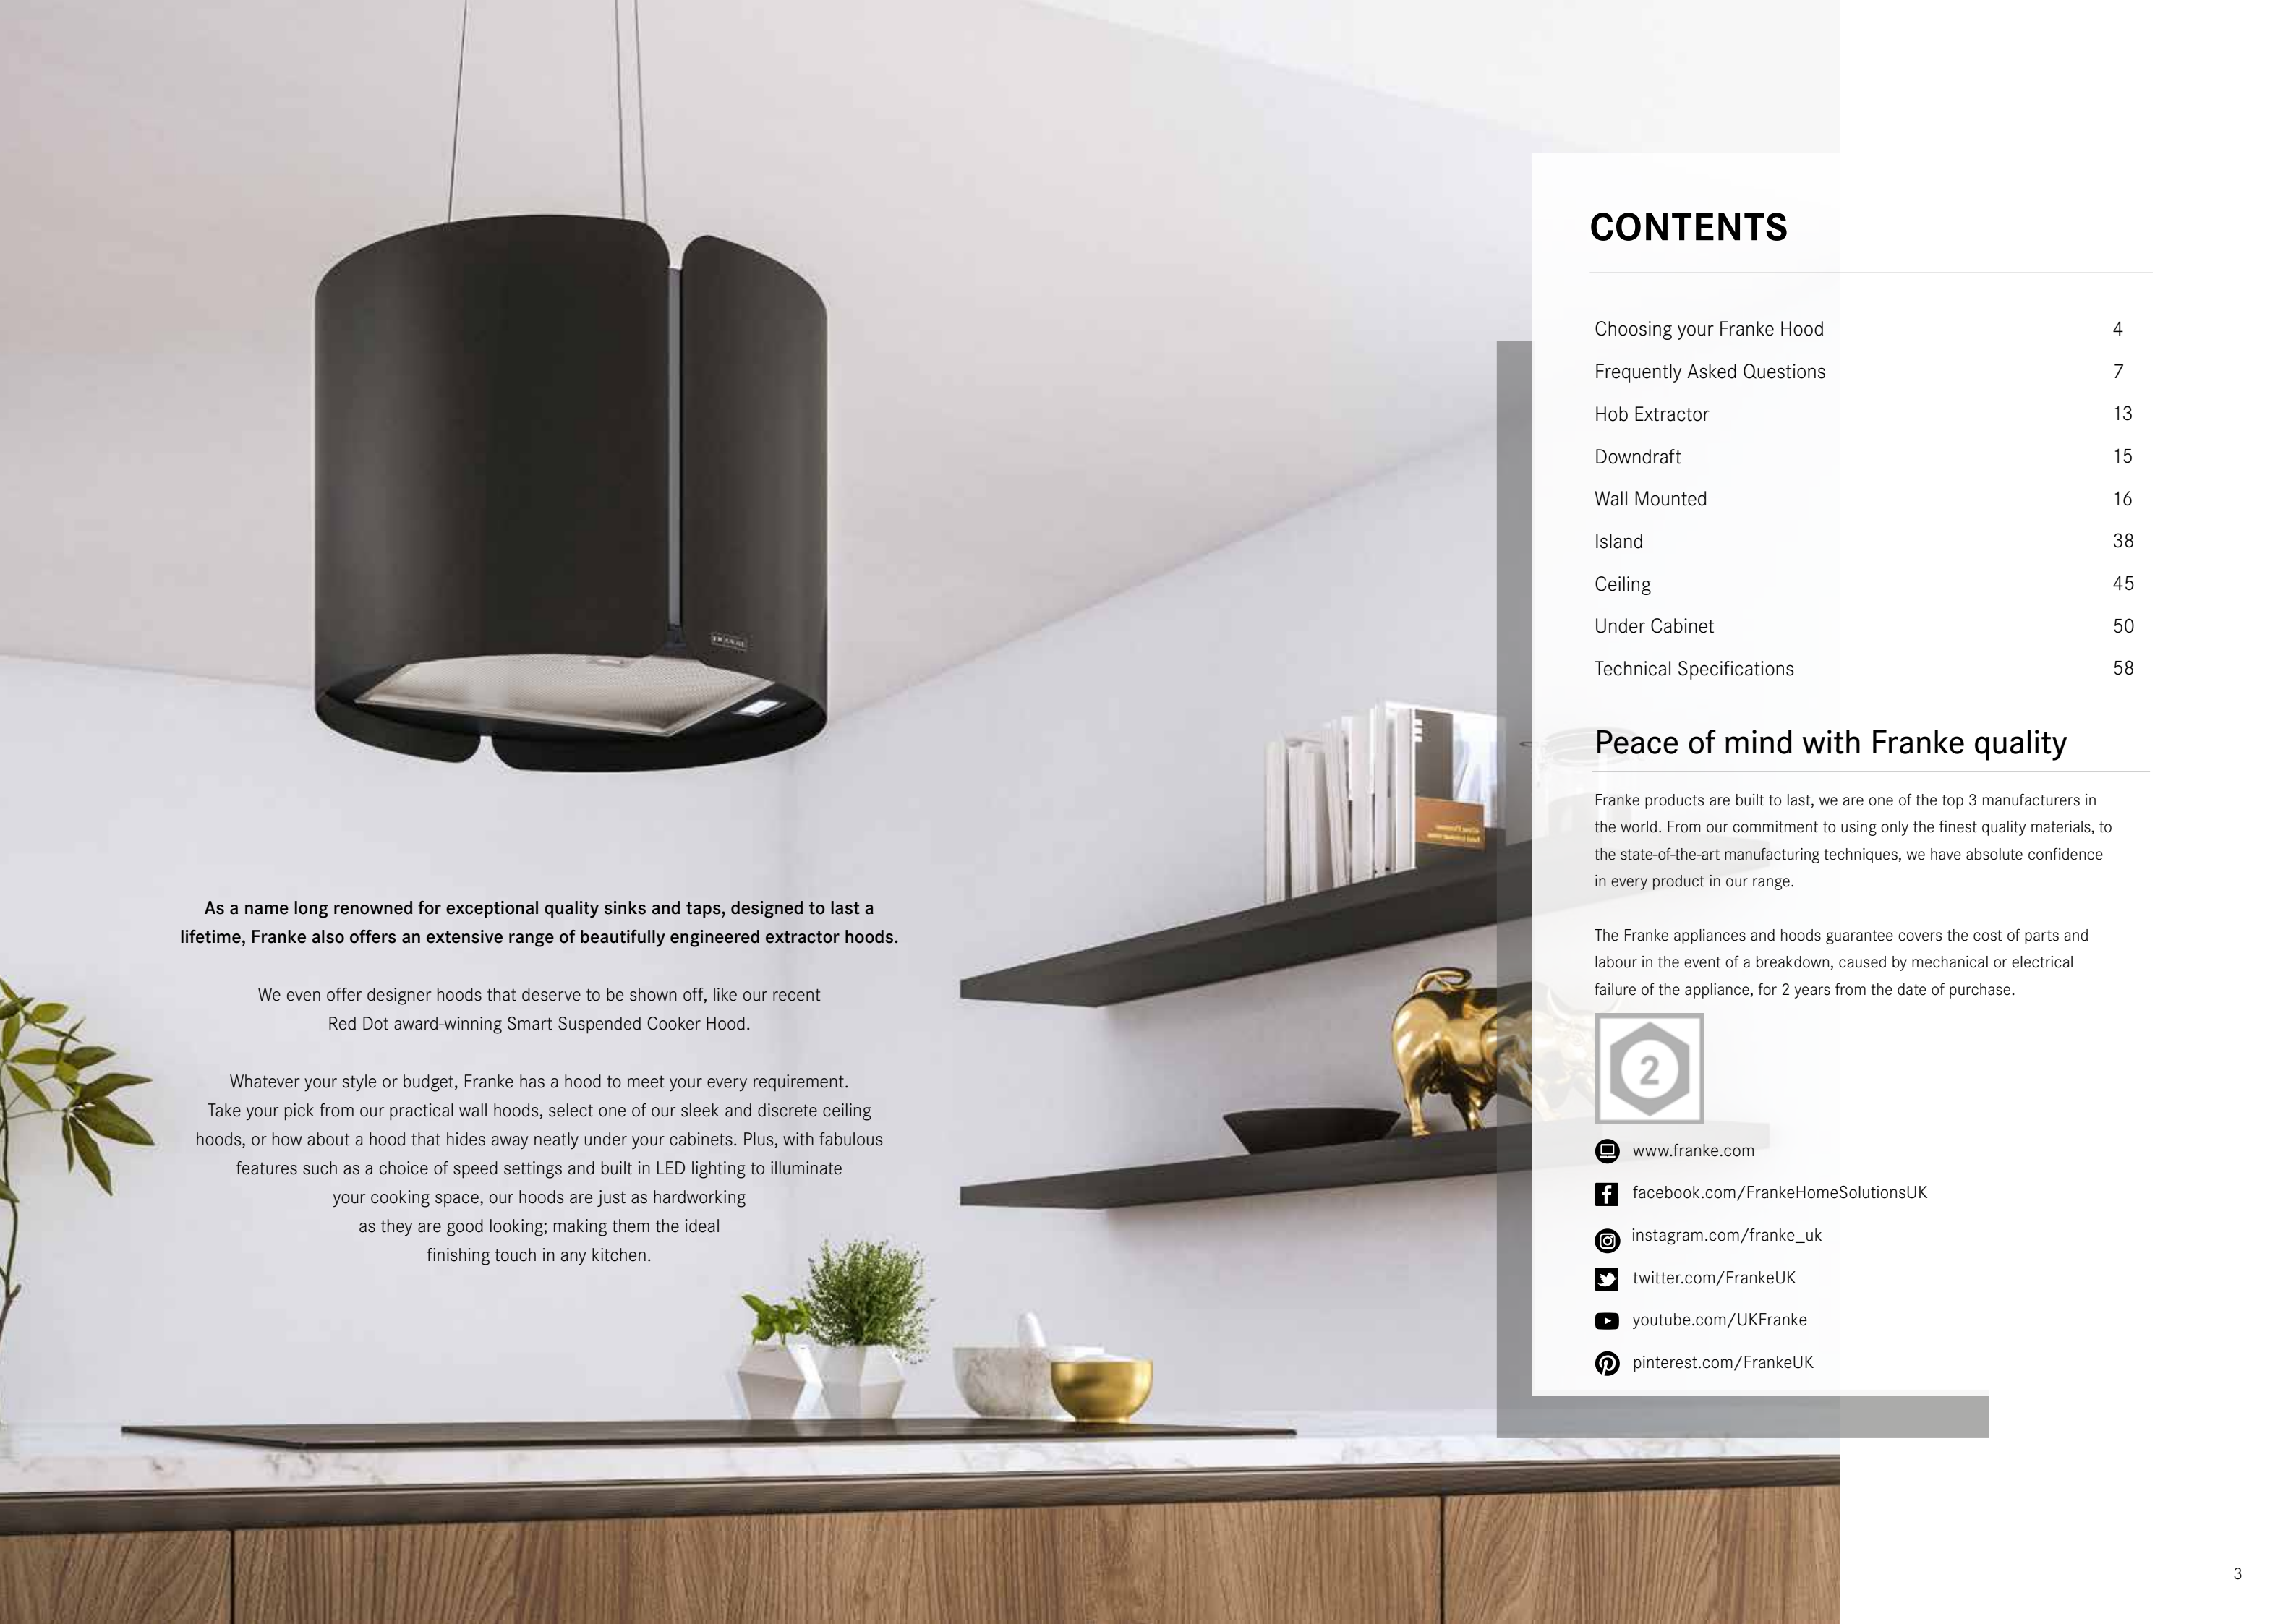

Hoods Collection

FRANKE

JANUARY 2023

As a name long renowned for exceptional quality sinks and taps, designed to last a lifetime, Franke also offers an extensive range of beautifully engineered extractor hoods.

We even offer designer hoods that deserve to be shown off, like our recent Red Dot award-winning Smart Suspended Cooker Hood.

Whatever your style or budget, Franke has a hood to meet your every requirement. Take your pick from our practical wall hoods, select one of our sleek and discrete ceiling hoods, or how about a hood that hides away neatly under your cabinets. Plus, with fabulous features such as a choice of speed settings and built in LED lighting to illuminate your cooking space, our hoods are just as hardworking as they are good looking; making them the ideal finishing touch in any kitchen.

CHOOSING YOUR FRANKE HOOD

What is the right hood for your kitchen size?

Optimum Rate of Airflow

To decide which hood to choose, first calculate the volume of the room. This figure can be arrived at by multiplying room length x width x height. So a kitchen that is 4 x 4 x 2.5 metres has a volume of 40m³. (see diagram).

This room volume figure is then further multiplied by 10 to obtain the optimum rate of airflow for that room, based on the need to change the air ten times an hour. So our kitchen of 40m³ x 10 = 400 – meaning it would require an extraction rate of 400m³/h for efficient ventilation of the room. For optimum extraction capability ensure that the hood width is equivalent or greater than the width of your hob.

Typical kitchen volume example:
X = 4m Y = 4m Z = 2.5m

ENERGY LABEL TO HELP YOU MAKE BETTER SAVINGS!

- Energy Efficiency Class:** This represents a summary of the individual efficiencies listed below. Hoods with the highest ratings consume less energy and are better for the environment.
- Annual Electricity Consumption (kWh/Annum):** Calculated on the basis of standard hood operating times (1 hour of aspiration and 2 hours of lighting per day).
- Fluid Dynamic Efficiency:** This shows how much energy is converted by the motor group to produce the air flow.
- Lighting Efficiency:** This shows how much of the lamp's energy is converted. More light efficient hoods will consume less energy for the same lighting power.
- Filter Efficiency:** This indicates the filter's capacity to capture and retain grease.
- Noise Level:** This is measured in dB at the hood's maximum fan speed (not the intensive setting).

HOB EXTRACTOR

This model extracts vapour downwards, discreetly reducing unwanted odours and steam in the kitchen. Made for minimalist kitchens, this extractor is top of the class in efficiency.

WALL-MOUNTED

Venting directly out of the wall, or set to recirculating mode, wall-mounted hoods offer a wide range of styles to suit your individual kitchen, each with innovative features and a premium finish.

CEILING

As the name suggests, the hood is installed directly into the ceiling and represents an understated choice, which can lend a more open feel to a kitchen.

DOWNDRAFT

For those wishing to make a real design statement, or just looking for something a little different, look no further than a downdraft hood. Featuring cutting-edge technology, the hood subtly retracts directly into the kitchen worktop at the touch of a button.

ISLAND

In larger kitchens boasting an island cooking area, an island freestanding hood is the perfect complement to create a focal point for the space.

UNDER CABINET

If space is a priority in your kitchen, a built in extractor hood is the ideal solution. The compact design fits neatly into a wall unit, with space for a spice rack in front. Saving space without compromising on efficiency.

FREQUENTLY ASKED QUESTIONS

1. How should a hood be properly installed?

The hood must be installed at a minimum distance of 65cm from the hob*. We recommend that you do not install it more than 75cm from the hob to properly remove vapours and steam. Choose pipes of 150mm in diameter (or no less than 120mm), with a ducting length of no longer than 3-4 metres, and with a maximum of 2 curves. WARNING: The warranty does not cover any damage caused by failure to observe minimum safety distances.

*This distance varies depending on the model style. Always check the installation manual for the correct measurement.

2. How can I identify my model of hood?

The model of hood is detailed on the label within the product (accessible by removing the metal/grid filters) with a code in the upper right of 7 or 9 digits starting at 63 ..., or a code of 10 digits.

3. How should I clean my hood?

Simply use a soft cloth and a neutral, chlorine-free detergent such as Franke Kitchen Care Cooker Hood Cleaner. Thanks to its professional formulation, Franke Kitchen Care Cooker Hood Cleaner effectively eliminates grease deposits and odours from your cooker hood, ensuring perfect cleanliness inside and out.

4. What is the difference between ducting out and recirculating?

It is preferable to install a hood on an outside wall, as this is the most effective and quiet solution; emitting polluted air outside via ducting, and drawing in new air. However, hoods can be installed onto party walls, or suspended from a ceiling. To install a hood in recycling/recirculating mode (i.e. with no ducting to outside) a Charcoal Filter must also be purchased - these can be obtained from our spare parts department: www.central-services.co.uk.

5. What ducting is recommended for the best extraction performance?

A ducting diameter of 150mm is recommended as the ideal for hoods with a capacity of 300 mc/h or height. If it is not possible to install this diameter of ducting, we recommend a 120mm diameter pipe. Smaller pipes adversely affect the flow rate and noise of the hood.

6. I am buying a 90cm hob - what size hood do I need?

You should purchase a hood no smaller than your hob size, eg when buying a 90cm hob you should purchase a hood measuring at least 90cm.

7. How can I reduce the noise of the hood if excessive?

The noise of a hood is generated by the airflow that passes inside it during operation. The internal components of our hoods have been built so that the airflow finds few obstacles to its passage, with excellent results in terms of effectiveness and low noise emission. An effective way of avoiding the increase in noise is to use, for the outflow of air, well-sized pipes (120-150mm in diameter). Dirty or saturated filters can hinder air flow: Periodic cleaning (or replacement) of filters ensures smooth air flow.

8. How do I perform an extraction test?

Before any “domestic” test, make sure the hood has been installed correctly following the installation steps contained in the instructions manual supplied with the product. This said, an “approximate” test can be performed by switching the hood on parallel to the cooker on which you can boil some water. If the installation is correct and poor extraction is caused by a fault in the product, you should call our technical team on 0161 436 6280.

9. What are the filters? How often do they need to be replaced?

Filters are an integral part of the hood, their maintenance affects the efficiency, safety and noise of the hood. Anti-grease filters protect the engine from the grease contained in vapours extracted by the hood. The metal filters on Franke hoods filter a high level of fat particles. To keep them efficient, just wash them by hand or dishwasher, on average every 2 months. Synthetic filters, possibly on some old models, are not washable and should be replaced when fat impregnated, about every 2 months. The odour filters are activated charcoal cartridges to be installed exclusively on hoods fitted in re-circulatory mode. They are not washable and should be replaced periodically, on average every 3 months. To find the appropriate carbon filter for your hood, see page 54.

10. Where can I order my hood spare parts or Franke Cooker Hood Cleaner from?

You can order spare parts or Franke Kitchen Care Cooker Hood Cleaner from: www.central-services.co.uk

AQ SENSE RANGE

Constantly monitoring and reacting to your air quality.

Keep the air you breathe clean and the atmosphere in your home pleasant with our innovative AQ-Sense hoods. Designed to constantly monitor indoor air quality and activate automatically when unsafe levels are detected, each model gives you up-to-date air quality information, via the dedicated Franke @ Home Cloud App.

The app also allows you to control each hood's many functions via your phone or tablet; switching aspiration on and off, adjusting extraction speeds or adapting light settings to provide the perfect ambience.

AIR QUALITY SENSOR

Constantly monitors VOC (Volatile Organic Compounds), air temperature and humidity to ensure your kitchen and home remain a fresh and pleasant environment.

FRANKE @ HOME CLOUD APP

As well as keeping you informed about the air quality in the kitchen, our mobile app allows you to easily control the hood, putting its many functions at your fingertips.

ALEXA* COMPATIBLE

All Franke AQ-Sense hoods are compatible with Amazon Alexa*, allowing you to use voice commands to switch the hood on and off, set the ventilation speed, activate the lights and check air quality, temperature and humidity levels.
(*device not included)

Features of AQ SENSE with touch screen

TOUCH SCREEN

21.5" Monitor with built-in browser.

CAMERA

From baby monitors to video doorbells, you can even connect IP or WIFI cameras to our AQ-Sense vertical flat model.

BUILT-IN BROWSER

Web browser allows you to access a world on online content directly from your hood - watch step-by-step cooking videos, play your favourite music, check the weather or catch up with the news.

MULTIPLE TIMERS

Manage several timers at the same time.

ADJUSTABLE WHITE LIGHT SETTINGS

Choose the white density of the light.

YOUR PICTURES

Customise the background and browse your favourite images.

AUTO FUNCTION

Automatically runs the hood at the minimum speed, for a few minutes each hour, to keep the atmosphere in your home fresh, right around the clock.

SOUND PRO

Enjoy the peace of cooking

As kitchens become places for meeting and sharing moments at home, hoods increasingly need to combine high performances with silent motors. Following in-depth studies and extensive research, Franke was able develop a solution: Sound PRO.

FLUID DYNAMIC OPTIMISATION

Thanks to an innovative design, the new motor significantly reduces turbulence and vortex of the internal air flow.

NOISE REDUCTION AND SOUND QUALITY OPTIMISATION

At maximum power, the new technology limits the noise threshold of the hood up to -6db*, but it doesn't stop there. It also optimises the sound produced, reducing the disturbance caused by high frequencies.

HOB EXTRACTOR & DOWNDRAFT

Offering the ultimate in discreet extraction, both the hob extractor and the downdraft are cleverly integrated within the kitchen units.

Features	Maris 2gether	Mythos 2gether
Energy Class	A++	A++
Interface	One slider control for all zones	Separate slider for each zone
Functions	1 hotplate level: Defrost or gently melt	3 hotplate levels: Cook/Keep warm at 42° Cook/Keep warm at 74° Cook/Keep warm at 92°
Hob Platform	Standard heat level control	More advanced induction function, improved temperature level variation
Display/Lighting	Red	White

NEW

MARIS 2GETHER

Black with Cast Iron Grid

- 4 induction zones
 - 2 flexi zones for big pans
 - Direct touch control with one slider
 - 9 levels plus booster function
- Timer for all zones
 - Grease efficiency class B
 - Dishwasher-proof grease filter
 - Easy to clean

The Maris Hob Extractor powerfully extracts up to 700 m³/h of air from around pots and pans located in the hob’s four cooking zones. Thanks to the flush-mounted robust cast-iron grid the hood is durable and heat-resistant, with an elegant black glass design which is flawlessly integrated into the worktop.

The best anti-drip technology available for Wall-Mounted Hoods, suited to modern induction hobs.

Exclusive design combining together matt and glossy black. The control panel is glossy while the lower section is matt to hide finger prints.

DRIP FREE THERMO-RESISTANCE BUTTON

At the touch of a button the heated glass panel stops condensation while the shape of the frontal filter area prevents drips forming. A simple touch of a button takes care of condensation, ensuring nothing drips down onto the hob or into your food.

NEW MARIS DRIP FREE
Black

An ideal blend of stylish design and practical performance, the Maris Drip Free Hood not only tackles odours but also combats condensation – preventing droplets from falling onto the hob.

The simple touch of a button activates the hood's drip free thermo-resistance function, directly tackling moisture and ensuring units and surfaces are safe from water damage. Additionally, hoods feature a recirculating mode plus odour eliminating charcoal filter to keep kitchens smelling fresh throughout the day.

Consisting of a single glass panel design with no hinges or gaps, the Maris Drip Free Hood is easy to clean and promotes greater hygiene in the kitchen. For visibility and easy operation, the hood features a glossy black control panel while the main section is a textured matt finish that contributes to its 'always dry' look.

Comes complete with chimney kit.

ISLAND

Space enhancing Island hoods provide a wonderful focal point in the kitchen

SOUND PRO

HUSH, it's cooking time!

As kitchens become places for meeting and sharing moments at home, hoods increasingly need to combine high performances with silent motors. Following in-depth studies and extensive research, Franke was able develop a solution: Sound PRO.

NOISE REDUCTION AND SOUND QUALITY OPTIMISATION

At maximum power, the new technology limits the noise threshold of the hood up to -6db*, but it doesn't stop there. It also optimizes the sound produced, reducing the disturbance caused by high frequencies.

NEW AVANT SILENCE

Stainless Steel/Black

A striking combination of power, quietness and innovative technology, without any compromise on design.

reddot winner 2022

Hanging from three wires, the Smart Suspended hoods make a unique impression, with clean lines and a distinguished shape. Visitors could be forgiven for thinking it was a designer light fitting.

Easy to clean

Simple linear surface makes it easy-to-clean.

Easy to use

Simple to change plug-in carbon filter, making ongoing maintenance hassle free.

Best performance

A-Class rated energy efficiency, with impressively high air capacity and an impressively low noise level.

NEW SMART SUSPENDED

Stainless Steel, White or Black

This new suspended cooker hood is distinguished by clean, simple shapes, synonymous with a modern design.

Available in three chic finishes; Matt black, Matt White and Stainless Steel, combine sleek design with cutting edge technology. They will make a real statement in the modern home, whilst making light work when it comes to keeping kitchens steam and odour free.

NEW

BOX FLUSH

To seamlessly fit within stylish home kitchens

With a flush frame design that integrates seamlessly into cabinets, Box Flush hoods are the perfect fit for your home and style.

Designed for intuitive operation, these powerful built-in hoods feature slim LED lighting and have no protruding buttons or controls. This improves the overall aesthetics and is easy to clean and maintain.

There's a choice of two models - our B energy rated Box Flush Evo model featuring flush controls available in Stainless Steel, Matt Black or White Matt finishes. Or our A energy rated Box Flush Premium model with remote and voice control, in Stainless Steel.

Featuring 3 speed settings plus a boost to quickly take care of steam and odours, the subtle yet stylish Box Flush ensures nothing gets in your way when cooking.

NEW BOX PLUS PREMIUM

Stainless Steel

Minimalistic design with no visible controls for a perfect cleanability and features remote and voice control. Its adjustable white LED lighting makes it an elegant and exceptionally efficient choice.

Cooks can also link the Box Flush Premium to any Alexa or Google Home compatible device, allowing access to some features using just voice – leaving hands free to focus on the cooking.

- Alexa compatible
- Flush mounted
- 24 hour circulation mode
- 30 minute delay mode
- Grease filter alarm
- Adjustable light intensity
- Adjustable light temperature

ADDITIONAL ACCESSORIES

Carbon Filters

Carbon Filters increase filtration efficiency and are required on all recycling hood units. Used to catch unwanted odours, they are supplied in either circular or square format, depending on the model of your hood. Please check models for correct configuration.
