Master Brochure
September 2022

Shaping our future

Preserving the environment – shaping the future: As a company conscious of our responsibilities, we think and act today in the interests of the world of tomorrow. We work hand in hand with our partners, customers and suppliers to create a liveable future where people can also thrive.

“We believe that sustainability means fairness to future generations” – this quote from Michael Pieper, owner of the Franke Group encapsulates our company ideals. We reconcile economics and ecology and make a proactive contribution towards sustainable development – with long-lasting products, recyclable materials and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on the three pillars of the environment, employees and the company. When it comes to environment, we focus on the production and lifecycles of our products. As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for more than two decades – conserving resources in the process.

We also feel an immense responsibility towards our employees, of which there are approximately 8700 around the world. Words like appreciation and trust aren’t just empty phrases to us, they’re deeply embedded in our company’s DNA.

We help people to stay healthy and to make their professional aspirations a reality. Franke is synonymous with diversity, equal opportunities, cohesion and a company culture where people want to give their best and contribute their own ideas.

Good for everyone!

Good for our partners and customers. Good for the planet. Good work. We believe that sustainability means planning ahead. We see environmental action as an opportunity and this attitude is also reflected in Franke’s products.

Less plastic and better taste

No packaging, no waste, no distance travelled: Drinking tap water uses significantly fewer environmental resources than mineral or carbonated water. Plastic bottles have a particularly stark effect on the environment – around the world, over 1500 bottles end up in the sea every second. It doesn’t have to be this way. With our Vital filter tap, you can transform tap water into delicious water to drink. In the smallest of spaces, the capsule filter combines activated carbon and a high-tech membrane to reliably remove bacteria, viruses, microplastic, rust, medication residues and hormones. Customers are therefore guaranteed clean drinking water which is equally good for their health and the environment.

Saving water has never been so easy

Another star in Franke’s range of products is the Atlas Neo Sensor. This innovative technology allows you to switch the water flow off and back on again even when your hands are covered with soap – in a completely touch-free system. This saves around three litres of water every time you wash your hands and keeps the tap spotless. The sensor will switch off automatically after 30 seconds. Needless to say, you can still operate the tap manually.

Be inspired

We are constantly thinking of new ways to make our range even better, adding new products, new ideas and new innovations. Keep up to date with it all on our social media platforms.

Over one hundred years of passion

Making something wonderful rarely happens overnight, and Franke has been pushing the boundaries for over 100 years. Founded in 1911, Franke was built on a foundation of precision engineering combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

Swiss precision engineering

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then we've established efficient and economic manufacturing facilities all around the world.

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart and stunning design.

FRANKE HOME SOLUTIONS

Complete solutions for your kitchen

Create Home Solutions with the Franke range of products

As a world leader in the design and manufacture of intelligent products and solutions for residential and professional audiences, we continue to lead the way in developing high-end design innovations.

Franke has built a reputation on producing high quality sinks and state-of-the art instant boiling water taps and we are extremely proud of what we produce. Looking ahead we are delighted to be introducing some impressive new lines into our range.

We are committed to ensuring our customers experience the pleasure that cooking, eating and entertaining in a kitchen fitted with our products can bring. This is the very essence that inspires us to make extraordinary products.

Every Franke product aims to be inspirational in every way, from the first glimpse of carefully considered design, to manufacturing standards that ensure you can feel the quality and craftsmanship of every piece.

This brochure captures the spirit of Franke in order to captivate and excite you. A comprehensive range of sinks, taps and accessories can help turn on everyday kitchen into a home solution and turn a daily chore into a guilty pleasure.

Let Home Solutions be Franke.

Find a sink to suit your style

To help you navigate the wide range of design, installation and functionality considerations surrounding your choice of sink, you'll have detailed information at your fingertips. Each option is explained fully over the following pages.

Add your perfect tap

Our taps are designed to fit a standard 35mm tap hole (except where indicated). It is also important to identify whether your home has a high or low pressure water system, as it will affect your choice of tap – your installer or kitchen retailer should be able to help with this.

Discover full kitchen solutions

Our inset waste bin sits neatly in the countertop so food waste can be quickly and hygienically disposed of, while maintaining a minimalist look, and the Franke waste sorter range has multiple solutions to aid in the environmentally friendly disposal of waste.

Thanks to a permanent magnet motor, Franke Turbo Elite Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquified into fine particles that are easily flushed through the pipework system.

Choose your perfect sink

The kitchen sink is seen as the heart of the kitchen, let your imagination run free with a range of options to help maximise space and accentuate the look of the room. The following information will help to ensure that your ideal sink is the perfect fit for your kitchen.

Inset sinks

Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

Undermount sinks

Undermount sinks are installed underneath the worksurface and therefore require a solid surface worktop such as granite or wood. They are not compatible with laminate worksurfaces.

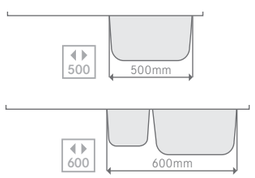

Belfast sinks

Belfast sinks can be used as either a freestanding feature with brackets or sit on top of base units.

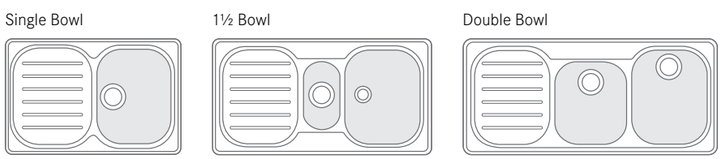

Measuring your cabinet width

It is essential to correctly measure the cabinet width where your sink will be installed. The bowl (or bowls) will need to fit into this space. Each sink in this brochure will show a cabinet size, and your cabinet width needs to be equal to or greater than the stated measurement.

Bowl and drainer configuration

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer – with the drainer on the left or right hand side. Conversely, other sinks are reversible which indicates the drainer can be positioned on either side.

BOWL CONFIGURATION

LHD or RHD: This indicates whether the drainer on the sink is found to the left or to the right of the main bowl.

REV: These reversible designs have a tap hole at the front and back, giving you the freedom to position the sink to provide either a left or right handed drainer.

LHSB & RHSB: For sinks without a drainer but with more than one bowl, this indicates which side the small bowl is positioned.

Details that make a difference

Small details can make a huge difference. Whether it's to save you time, make cleaning easier, boost performance or simply provide an efficient solution for life's little challenges, every aspect of a Franke sink is carefully designed to make life easier.

Advanced waste systems

Franke sinks are equipped with stainless steel strainer wastes which can be used to prevent foodstuffs from entering the waste system. Franke waste kits may include such features as Sanitized® anti-bacterial properties and fast flowing air vent systems allowing you to benefit from extra cupboard space.

Deeper bowls

Many Franke stainless steel sink bowls are formed using a manufacturing technique known as deep-drawing and annealing. The bowls are formed using a 2-stage process which starts with deep drawing a flat sheet of steel. The annealing process allows the final bowls to be deeper, without compromising the integrity of the steel.

Heat and sound insulation

Selected Franke stainless steel bowls are sound insulated to reduce the sound of water in the bowl. This is achieved by rubber insulation pads under the sink, or by a sprayed dynaphon layer, applied during manufacture. The grey dynaphon spray also insulates, keeping water warmer for longer.

Franke More in Store

We believe that the best place to buy our products is in store. That's because you get a friendly face to listen to and offer expert advice. You also get an unrivalled opportunity to see and feel the quality of Franke for yourself.

That's why we created More in Store, an initiative to support our retailers in giving you great service and the best possible buying experience. What it means for you is more choice, better quality, more knowledge and unbeatable after sales support.

Find your nearest Franke retailer by using the Dealer Locator at www.franke.co.uk/dealers

FRANKE

Material & finish options

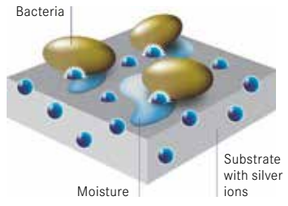

Everyone has a different vision of what would make their kitchen exceptonal, and that often begins with how they intend to use it. The demands on your sink will dictate which material is right for your kitchen, as each precision engineered material has individual character and unique benefits. Our range covers everything from the latest trends to traditional favourites, so pick the one that best fits with your cooking style, your lifestyle and your personal taste.

Fragranite treated with Sanitized®

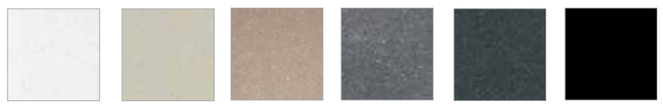

Fragranite is an exceptionally tough material which is highly resistant to burns, dents, chips and stains. It was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%.

Active biocidal substance: silver ions. The silver ion locates the bacteria via the moisture and deactivates it.

Fragranite is available in a range of colours:

Note: Stainless Steel as a material is not scratch resistant. The more it gets used, a patina will develop over time.

Stainless Steel

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful and is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake or break. It's the most popular material – and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

Franke offers sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a stainless steel solution for you.

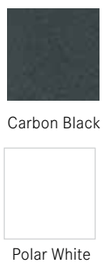

Ceramic

Ceramic sinks have been a popular choice for years and combine well with a variety of work surfaces such as wood, glass and granite. Ceramic sinks have a smooth, impervious surface, which is resistant to all standard household chemicals. It's a very hardwearing choice that stands up to heat, staining and impacts with ease.

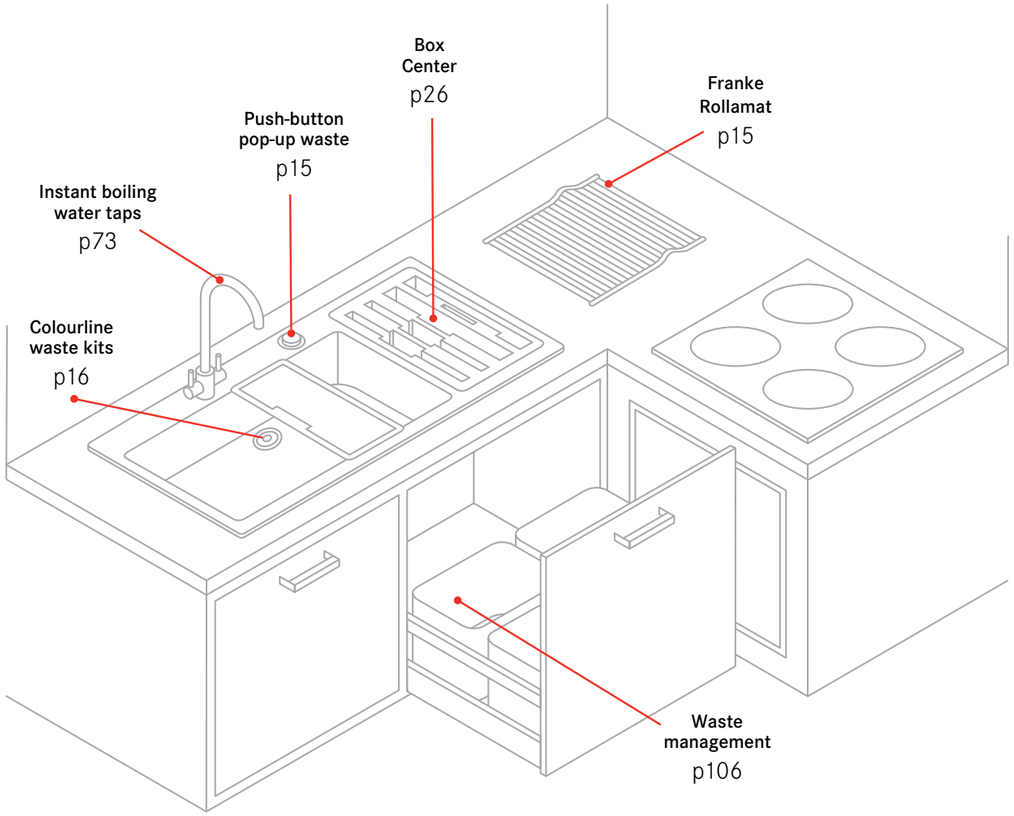

Tectonite

Exceptional resistance to heat, shock and impact, coupled with unique design freedom makes Tectonite sinks the ultimate choice for hardworking, stylish kitchens. New technology represents a giant leap forward for synthetic materials, whilst allowing for exciting minimalist designs in the most popular colour options.

INNOVATION

Innovation is in our DNA

We continue to be passionate innovators and our aim is to constantly improve the look and usability of our designs. Staying at the forefront of the industry is vitally important to us, so we have continually enhanced manufacturing techniques and made pioneering use of new materials to explore exciting new design possibilities. This means our range is always evolving to include the very highest levels of form and function.

INNOVATION

Hygienic Overflow

Many Franke sinks come with a Hygienic Overflow. Removal of the logo plate reveals the overflow aperture for hygienic cleaning.

INNOVATION

Slimfix®

The Slimfix® technology has enabled Franke designers to reduce the width, depth and profile of the outer rim, resulting in a sink virtually flush with the worktop.

INNOVATION

Push-button pop-up waste

A patented push-button system from Franke, the pop-up waste enables you to conveniently empty the bowl without putting your hands in the sink.

INNOVATION

Instant Boiling Water Taps

The electronically controlled Minerva 4-in-1 tap features a child safety function and filter warning light, while the Omni is the world's first mechanical 4-in-1 tap. See page 73.

INNOVATION

Active Twist

We've created a tap that works differently; with the ability to not only fill the sink but empty it. Alongside its stylish looks, we've incorporated an innovative special feature that links the tap and sink with a twist dial. See page 96.

INNOVATION

Box Center

Kitchen accessories become part of the sink unit and easily accessible. These large bowls are available as inset/ flushmount and undermount options, see page 26.

INNOVATION

Andy Chef

This compact holder includes a wooden chopping board, a professional chef knife and a strainer bowl and fits perfectly with our Box BXX range of sinks. See page 53.

INNOVATION

Franke Rollamat

This handy accessory can be used to drain glasses or crockery, but also doubles as a trivet to protect the work surface from hot, heavy cookware straight from the oven, hob or grill.

Elegant, harmonious, made for each other

Complete the look with our Colourline waste kits

For a more contemporary, coordinated finish, look no further than Franke's Colourline waste kits collection.

All the elements in our Colourline collection match perfectly with our popular Fragranite sinks and can be easily retro fitted into any of our Onyx or Matt Black designs. Thanks to a special UV additive included during the manufacturing process, they won't fade over time. Every Colourline accessory is made to withstand high temperatures, is scratch and stain resistant, easy to clean and food contact safe. Plus, for the highest standards of hygiene, the material is treated with antimicrobial Sanitized, which we apply to all Fragranite sinks. Everything from the waste and overflow to the waste control knob offers consistent colouring throughout. And thanks to a special UV additive included during the manufacturing process, you can be sure they won't fade over time.

INNOVATION

The ideal fit for our Fragranite sinks

The Urban UBG 611-86, UBG 611-100 and UBG 651 in Matt Black will automatically be supplied with the new Colourline Waste in Matt Black.

Return & Recycle

Matt Black waste kits are available for many Fragranite sinks and can be purchased from our spare parts service centre, Central Services.

Then, simply return the waste contained in your new sink box back to Central Services for a refund.

For full details including Terms & Conditions, visit Central Services/Franke Accessories (central-servicesuk.co.uk)

GREAT MEALS, NO INTERRUPTIONS **IT ALL COMES TOGETHER WITH ALL-IN**

Transforming your sink into a stylish and playful workstation, All-In is the flexible food preparation system designed to bring more flow to your kitchen and life.

Prepare
Using the bamboo board, telescopic bridge, strainer and collector bowls, All-In can help you:

- Chop ingredients
- Collect the cut food
- Collect waste
- Store prepped ingredients in the fridge

Cook
The bridge, strainer bowls and foldable pad are useful whilst cooking and you can:

- Rest pots and pans on the bridge.
- Use the strainer to drain ingredients
- Stand hot pans on the foldable pad to protect work surfaces

Clean
When it's time to wash up, the bridge, strainer bowls and foldable pad can help you to:

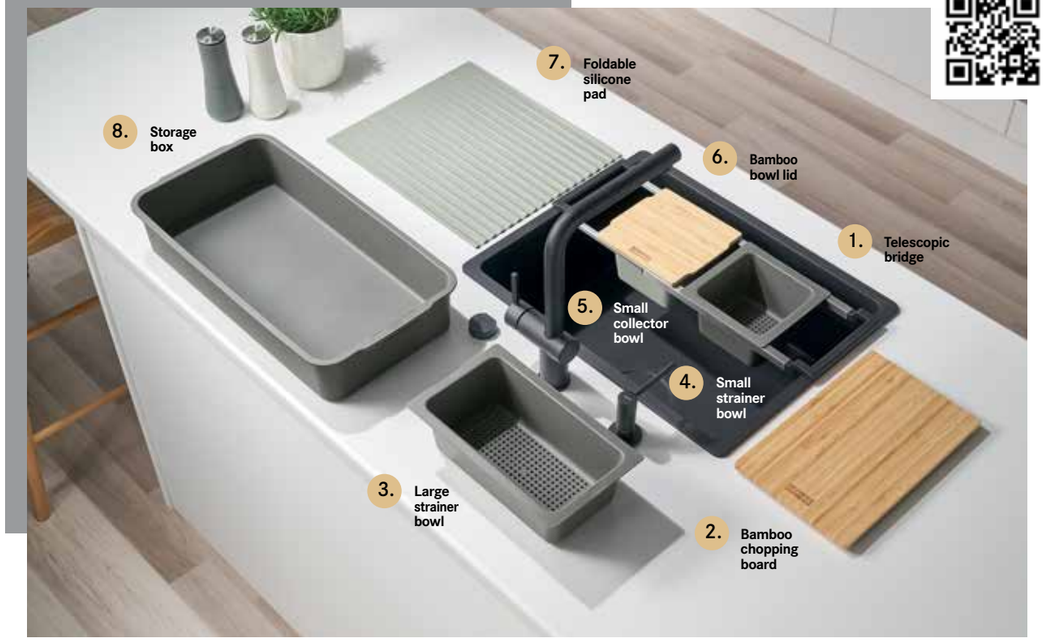

- Drain glasses and dishes
- Drain cutlery and cooking utensils

Tidy
Once the washing up is finished, All-In can help you to tidy everything away, whether it's to:

- Store cleaning items in the sink
- Keep everything together in the storage box
- Put everything away in your kitchen cabinets

Eight accessories, endless combinations, fits any sink*

Taps worth talking about

The Franke tap range provides your kitchen with a focal point – and in some cases, a talking point. Featuring cutting edge design and a whole host of innovative features to enhance your lifestyle – from filtered cold water, to Instant Boiling Water – the range spans the entire spectrum of form and function.

Instant boiling water taps

Get instant 100°C water at your fingertips, straight from your kitchen tap, with Franke boiling water taps. Perfect for making drinks or getting meals underway in a flash, they combine safety, stylish design and cutting-edge technology.

Mixer taps

Our wonderful range spans the entire spectrum of design, from traditional to contemporary. Many have features to simplify meal preparation and kitchen tasks so that the everyday can become wonderful.

Filtered water taps

Our Vital and FilterFlow taps deliver hot, cold and filtered water in high style. No need to buy bottled water and you can even do your bit for the environment.

Tap flow rates explained

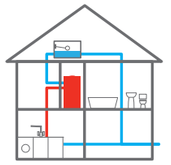

Before choosing your Franke tap it is essential to check whether you have a high or low pressure water system.

If your property has a low pressure water system you will need to check the flow rating of the taps before you make a purchase. If you install a tap with a low flow rating into a low pressure water system you may be disappointed with the flow of water from your tap. In these instances it will be difficult to achieve a suitable mixed flow of water through the tap as the cold mains water is delivered at a higher pressure and will overpower the weaker hot water pressure.

If you have a high pressure system in your home, such as a combi-boiler or pumped system, you should be able to choose from the full range of taps in our range. We strongly recommend that your plumber or installer checks the water pressure in your home before making a purchase.

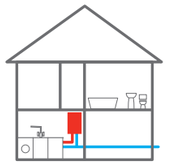

This symbol indicates the tap will work with a low pressure system, delivering at least 4 litres per minute of hot water at 0.3 bar pressure.

Low pressure (Gravity-fed system)

You have a cold water tank in your attic and a hot water tank in your airing cupboard. You should choose taps which state they are suitable for a low pressure system.

High pressure (Combi-boiler system)

You have a boiler unit but no hot water cylinder. The boiler unit is usually found in the kitchen and delivers hot water on demand. You should be able to choose from most of our taps.

High pressure (Pumped system)

You have a hot water cylinder with an expansion vessel on top (often called Megaflo), usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.

Fragranite Inset Sinks
treated with **Sanitized®**
and **Tectonite Inset Sinks**

Durable, versatile Fragranite offers a host of practical and aesthetic benefits. The surface's rich colour will not stain, mark or fade over time. Plus being heat, impact and scratch resistant, it's perfect for busy family homes. What's more Fragranite's Sanitized® coating reduces bacteria and microbe growth by 99%, helping keep your sink hygienic and clean.

Similarly, Tectonite sinks have a unique texture and granite-like appearance and are available in the most popular colour choices. Heat resistant up to 300°C, Tectonite's coated surface is protected against stains and bacteria.

50 Year Guarantee

Contains biocidal substance: silver phosphate glass. The silver ion locates the bacteria via the moisture and deactivates it.

Contemporary, Coordinated Colourline

Our Colourline waste collection match perfectly with our Fragranite sinks and can be easily retro fitted into any of our Onyx or Matt Black designs. Made to withstand high temperatures, they're scratch and stain resistant, easy to clean and food contact safe. Plus, for the highest standards of hygiene, the material is treated with antimicrobial Sanitized®. And thanks to a special UV additive included during the manufacturing process, you can be sure they won't fade over time.

Colourline

Return & Recycle

Matt Black waste kits are available to purchase from Central Services.

Return the waste contained in the sink box to Central Services for a refund.
For full details, see page 17.

Ceramic
Inset Sinks

Ceramic sinks combine beautifully with a variety of work surfaces such as wood, glass and granite. It's no wonder they have been a popular choice for years and their smooth, impervious surface is resistant to all standard household chemicals, making them perfect for modern, hardworking kitchens. It's a durable choice that stands up to heat, staining and impact with ease; so there's much more to ceramic than silky smooth good looks.

50 Year Guarantee

FRANKE by Villeroy & Boch

Stainless Steel Undermount Sinks

It's your kitchen, so why should you compromise on style or performance? Stainless steel undermounts are particularly easy to clean and exceptionally durable, so luckily you don't have to.

They give a flawless, uninterrupted look to your kitchen and for solid work surfaces such as granite and wood, a stainless steel undermount sink clips directly underneath the surface to provide a work area that is practical and hygienic. These sinks not only look beautiful, but are resistant to staining, chipping, rust and corrosion. With a long history as the world's premium brand in kitchen sinks, you can be confident that you are buying a quality product with premium features. In fact, we are so confident about the quality of manufacture that we offer a 50-year guarantee on all Franke sinks.

50 Year Guarantee

Please note: The majority of 1.5 bowl sinks have a template which gives a flange reveal to accommodate accessories. We recommend that you speak to your worktop fabricator to ensure whether or not this is required.

Contemporary, Coordinated Colourline

Our Colourline collection match perfectly with our Fragranite sinks and can be easily retro fitted into any of our Onyx or Matt Black designs. Made to withstand high temperatures, they're scratch and stain resistant, easy to clean and food contact safe. Plus, for the highest standards of hygiene, the material is treated with antimicrobial Sanitized. And thanks to a special UV additive included during the manufacturing process, you can be sure they won't fade over time.

Fragranite & Ceramic Undermount Sinks

Wonderful spaces should simply flow. With undermount sinks, there is nothing to break the smooth flow of your solid granite or wood worksurface. A granite undermount sink provides a subtle complement to your kitchen design. Alternatively, create a bold contrast to granite surfaces with the striking look of a ceramic sink with a splash of colour. Either option represents a hardwearing choice that turns a kitchen into a work area that's a pleasure to be in.

Please note: The majority of 1.5 bowl sinks have a template which gives a flange reveal to accommodate accessories. We recommend that you speak to your worktop fabricator to ensure whether or not this is required.

Franke Taps Collection

Image shows Box Center BWX 120 41-27 with Minerva 4-in-1 Copper Instant Boiling Water Tap

Instant Boiling Water Taps - The Ultimate Kitchen Companion

With kitchen design playing a key role in home improvement, the future of the kitchen has arrived with the introduction of instant boiling water taps. Franke Boiling Water taps offer hot, cold and instant 100°C boiling water to save time, energy and water in a single stylish, convenient and space-saving unit.

You can now cook vegetables, create pasta dishes, sterilise babies bottles and make tea or coffee quicker than ever before with 100°C boiling water available instantly. Most 'boiling' tap systems only produce less than 98°C so hot drinks don't taste as good as they should.

Please check your domestic water pressure in relation to the tap operating pressure before purchase.

Each filter lasts around 6 - 9 months and replacing the filter is as easy as changing a lightbulb.

The Franke instant boiling water taps deliver fully boiling 100°C water instantly for the perfect cuppa.

It is important that you change your filter regularly to keep the water free of impurities and fresh to drink. This will also protect the system from harmful debris and deposits.

Minerva 4-in-1 Electronic Range

The electronically controlled Minerva 4-in-1 tap delivers 100°C boiling, warm, cold or cold filtered water in an instant.

The Minerva 4-in-1 Electronic features the M-Box

For a faster, flawless installation our popular Minerva 4-in-1 taps now feature the Franke M-Box. Incorporating a Franke Pro M filter, inlet combination, mixing valve set, gasket set and control box in a single unit, the **M-Box tidies pipework and allows for horizontal or vertical installation** in as little as 20 minutes.

Dimensions of tank:
Width 550mm Height 142mm Depth 211mm

Minerva
4 in 1
ELECTRONIC

HOW TO WORK THE MINERVA 4-IN-1

Pressing in the electronic dial wakes the tap from its safety standby mode when the dial glows white. For 100°C boiling water, select the red light and pressing the dial in twice will automatically dispense 30 seconds worth of water, enough to fill a pan, press three times for 60 seconds. Select blue for cold filtered water and a double press of the dial will dispense cold filtered water for 15 seconds, press three times for 30 seconds. The flow of water in each case can also be controlled manually by turning and holding the dial to give more or less water than the pre-set options. The user can select which mode best suits the task in hand.

- Red — Boiling water
- White — Neutral setting
- Blue — Filtered water
- Red/Blue colour combination — Boiling water warning

SIX STUNNING FINISHES

Make a statement in your kitchen with one of our six finishes. The taps are solid stainless steel with a long lasting coating keeping the structure of the stainless steel visible. With a choice of 2 models; Mondial L Spout or Helix J Spout, there is always a tap that fits your kitchen style. Or, alternatively there is the Original in Chrome as a more traditional style.

Omni 4-in-1 Range

Omni 4-in-1 delivers not only hot and cold mains water but also cold filtered and 100°C boiling water. Omni delivers beautifully pure, fresh tasting water, so there's no need for expensive bottled water. Omni is easy to fit in or existing kitchens, safe to use and ultra reliable with a 3-year guarantee. Best of all, it's refreshingly affordable.

Omni

ONE TAP DOES IT ALL

Dimensions of tank:
Width 182mm Height 355mm Depth 233mm

4-in-1 technology

Omni is the world's first mechanical 4-in-1 kitchen mixer tap, offering filtered boiling and filtered cold water, as well as the usual mains hot and cold.

Minimal maintenance

Omni is a complete system, including tap, boiler and under sink filter. The filter provides high quality drinking water and also protects the boiler from limescale build-up. Each filter lasts around 6 - 9 months and replacing the filter is as easy as changing a lightbulb.

True 100°C boiling water

Most 'boiling' tap systems only produce less than 98°C so hot drinks don't taste as good as they should. Omni delivers fully boiling 100°C water instantly for the perfect cuppa.

Easy installation

Virtually no tools and minimal plumbing skills are required for installation.

Safety assured

Omni is safer than a traditional kettle in so many ways; there are no cords which can be pulled to avoid any nasty accidents as on a kettle. The childproof push-to-activate lever helps to keep boiling water away from little hands. The lever is also spring loaded to switch off instantly if any splashes occur.

A child safety clip is provided for total protection from curious little hands or visitors to your home. All this and the patented chassis engineering means the tap is never too hot to the touch. It stays cool even when producing boiling water.

A full 3-year guarantee for total reliability

A 3-year manufacturer's guarantee covers the complete system for your total peace of mind.

Exceptional aftercare

Our UK based advisors are always on hand to help. Filters tell you when they need replacing, and replacements are easy to order by phone or online.

Minerva 3-in-1 Range

The Minerva 3-in-1 tap provides hot, cold and 100°C boiling water. The humble kitchen tap is transformed into a space-saving, time-saving helper with this boiling water tap and there are 3 stylish designs to choose from.

Safety is assured with a two-step safety handle, while the fully insulated spout and handle ensure that they both stay cool to the touch. The Minerva system features a space-saving water tank that fits discreetly into your kitchen so that boiling water is always ready when you need it.

Discreet and suitable for almost any kitchen, the heating tank in horizontal position can sit neatly behind a standard 150mm cabinet plinth, freeing up much-needed cupboard space. Those who have chosen Minerva in their kitchen have found it not only provides a stylish and functional addition to their home, but is also a real talking point.

Water tank can fit **vertically** or **horizontally** in your cabinet

Dimensions of tank:
Width 550mm Height 142mm Depth 211mm

Please note: The Franke Minerva range of taps require a minimum water pressure of 1.5 bar hot and 1.5 bar cold to function correctly. Please consult your plumber or installer before purchase.

FilterFlow Taps

The stylish and superbly engineered FilterFlow range is the blueprint for multi-tasking kitchen taps. Having filtered water at your fingertips means no more cumbersome, expensive bottled water, and naturally, there is the peace of mind of knowing your family's drinking water is clean, refreshing and free of impurities. Franke FilterFlow taps remove a wide range of impurities, including chlorine, organic matter, chemical and pharmaceutical traces, metallics and sediment.

What about the things that are good for you?

The FilterFlow tap won't remove minerals and desirable elements such as calcium, magnesium and fluoride. These are dissolved in the water and no part of the filtration process removes these from the water. They remain intact – and help to ensure your water is as healthy as it is refreshing.

Please note: Franke FilterFlow taps require a minimum water pressure of 1 bar (hot and cold).
Be sure to ask a qualified installer to check your home's plumbing system and water pressure before purchase.

All prices are inclusive of VAT

Franke FilterFlow

Playing our part in reducing plastics free refillable water flasks with selected Franke taps

The amount of plastic going into landfill is an ever-increasing problem. And each year more than 8 million tonnes of plastic finds its way into our oceans - polluting the water, affecting marine life and, in turn, impacting on the food chain and our overall health. One of the biggest contributors to this problem is single use plastic water bottles.

Why not play your part by switching to a sustainable refillable water bottle? We can all help to reduce the impact plastic is having on the planet.

How do FilterFlow taps work?

Franke FilterFlow taps are connected to a compact filter system that is fitted below the sink. When you select the tap's third lever, cold water is diverted through the filter system. The system's filter cartridge removes contaminants before the freshly filtered water travels back through a dedicated waterway inside the tap's spout.

The filtration process

FilterFlow filter cartridges provide a unique and highly effective two-stage filtration process. The cartridges feature an outer ceramic shell and an inner carbon core. The fine ceramic has the ability to trap even the most microscopic of impurities, down to sub-micron level. The activated carbon core is manufactured from solid carbon rod, and eliminates contaminants such as chlorine and heavy metals, as well as unpleasant odours.

Which impurities does a FilterFlow tap remove?

Franke FilterFlow taps will remove a wide range of impurities, including chlorine and chloramine – which you can often smell in tap water – organic matter, chemical and pharmaceutical traces, metallics and sediment. Importantly, a FilterFlow tap also has the capacity to remove harmful, sickness inducing bacteria, if it is present.

Technical essentials

On average, a Franke FilterFlow tap will deliver around 2,500 litres of filtered water before its filter cartridge will need changing. And that couldn't be simpler. It's a 1-2-3 operation and as easy as changing a lightbulb.

Vital Chiller

- 2.5L Capacity
- Sits in cabinet under the sink
- Temperature range: 5-12ºC
- Low noise system
- Stainless Steel
- Compatible only with Vital Capsule filter taps

One size: £574

Save money and reduce plastic waste

Just what makes the Vital system such a big deal? It's the small but mighty capsule filter.

This unique design is not only the smallest in the world, but also the first to combine activated carbon with a high-tech membrane capable of filtering and purifying water. Adapting to your usage needs and lifestyle, it's available in two variants – High Flow and High Performance.

- Enjoy pure, great tasting water directly from the tap
- Compact over sink design doesn't take up valuable cupboard space
- Removes contaminants while retaining vital minerals
- LED light indicates when the filter needs to be replaced
- Filter is quick and simple to replace

Two filters to suit all conditions

Tailored to suit the water quality wherever you live, the Vital Filter system is supplied with two different filter types – the High Performance filter or the High Flow version.

High Performance Filter

Thanks to the integrated action of the activated carbon fibre and high-tech membrane, this filter removes sediments, impurities, not to mention bad odours and tastes. However, Vital's High Performance filter is also able to remove microplastics and up to 99.99% of harmful germs!*

*Please note: due to the thicker mesh used in our high performance filter, consumers may notice a slightly reduced flow rate. However, this is perfectly normal.

High Flow Filter

The High Flow filter gives you both pure, safe, great tasting tap water combined with a high flow rate. Because this filter comes without the high-tech membrane, it's not able to remove microplastics and harmful germs as extensively as the High Performance filter.

All prices are inclusive of VAT

Franke Designer Tap Collection

We place huge importance on creating products that stand the test of time and make your kitchen a more wonderful place to cook and entertain. From extravagant to purist. From Decor Steel finish to polished Chrome or Solid Stainless Steel. Whether you prefer a flexible, pull-out spray or directional nozzle, the Franke tap range meets every need in every kitchen. Your favourite Franke tap will be the perfect complement to your ideal Franke sink. Designed for a discerning clientele, this collection has styles and attributes to meet every taste. Franke is so confident of the quality and manufacture of these models, that we guarantee them between 2 - 5 years on the finish and 5 years on internal working parts.

Atlas Neo Sensor

ACTIVE TWIST:
THE INNOVATION THAT MERGES TAP AND SINK

A tap that works differently; with the ability to not only fill the sink but empty it too. An innovative special feature that links the tap and sink with a twist dial, that when turned, operates the waste outlet, so water drains away, easily, safely and hygienically, without you having to put your hands into hot, dirty water.

Features and benefits

Innovative Integrated Twist Waste Control

The all-in-one design includes a special dial that when turned, operates the waste outlet, so the water drains away easily, safely and hygienically.

Eco Cartridge

Designed to limit both the flow and temperature, the ECO Cartridge helps to actively save both water and energy. It is possible to reduce water usage by as much as 50%.

Spray Jet Function

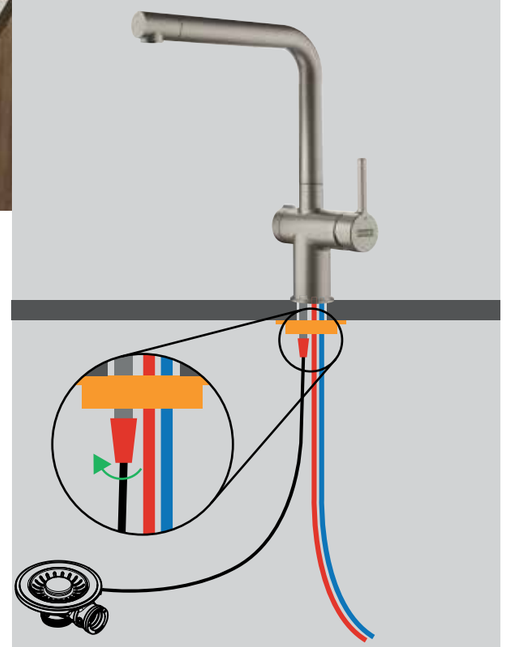

Delivering a more powerful stream, the spray jet function makes it easier to rinse fruit and vegetables, remove stubborn dirt on dishes and can also reach every part of the sink, making it easier to clean.

Laminar Aerator

The laminar aerator fitted in the spout ensures the Active Twist delivers a crystal clear, non splashing water stream, with very little noise.

Easy Clean Design

The Active Twist's fluid, curved design and rounded edges make it easier to clean.

Active Twist

Kitchen Solutions

Franke innovation doesn’t end with sinks and taps.

We strive to make your life easier in every aspect of your kitchen with a range of convenient and practical kitchen solutions. From dealing with unsightly household waste in a hygienic manner to effortlessly sorting waste for recycling, they are designed to save time and to incorporate kitchen essentials discreetly into kitchen units, so that you can maintain a clean, uncluttered kitchen.

Tap Brace

- Connects the tap to the worktop for extra support
- Variable collar fits any model of tap
- Can be used on any stainless steel inset sink

133.0026.896 £17

Waste Bin

- Inset stainless steel system
- 12 litre polyethylene container
- Sits flush with worktop
- Cover keeps odours sealed inside

134.0035.042 £315

All prices are inclusive of VAT

Franke Waste Sorter Bins

Fitting neatly into most standard cabinets, Franke Waste Sorters feature separate plastic containers to sort domestic waste into different categories such as food, cans, plastic and paper. A lid closes over the bins to contain any odours. Franke Waste Sorters are the convenient alternative to the conventional waste bin.

Standard door systems

The Franke 300 Series Sorter Systems are a useful addition to any kitchen with standard doors, fitting neatly into 450mm and 600mm kitchen base units. Each bin has a handle that can also be used to secure waste bags. The roll-out carrier is fully waterproof, simple to dismantle and easy to clean.

Sorter 300-45 Duo

- Cabinet width 450mm
- 2 x 22L bin

SORTER

300-45 Duo **£334**

Sorter 300-45 Trio

Franke Waste Disposal Units

A choice of five waste disposal units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate. Thanks to a permanent magnet motor, Franke Turbo Elite Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

See the WDU
UKFranke

Waste disposal units are designed to deal with small amounts of organic waste such as fruit and vegetable peelings, small bones from fish and chicken, coffee grounds, pips and seeds, nutshells, eggshells, rice and leftover meat. But to prevent any problems, avoid putting teabags, seafood shells, corn cobs, banana skins, pineapple leaves or metal, glass, plastic and paper down it. Plus, to keep things smelling clean and fresh, don't use drain cleaner – instead squirt a few drops of lemon juice in there.

NB. Ensure WDU dimensions can be accommodated within the specified cabinet width.

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required, eg MRX 251 left hand drainer or MRX 251 right hand drainer. All bowls sizes and dimensions are described in mm.

Franke sinks are guaranteed against manufacturing defect for 50 years. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings, 'O' rings and finishes (5 years for stainless steel taps), and 5 years in relation to valve mechanisms and working parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights. For full details see www.franke.co.uk/guarantee.

Prices shown on the website are UK mainland prices effective from 16th May 2022 and include VAT at the current rate of 20%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. E & OE. Front cover shows Vital Capsule Filter 3-in-1 Semi-Pro Tap in Matt Black/Decor Steel PVD.
