

## 1. SAFETY INFORMATION

 For your own safety and to ensure proper operation of the appliance, please read this manual carefully before installation and operation. Keep these instructions together with the appliance, even if it is sold or transferred to third parties. It is important that users know all the appliance's operating and safety characteristics.

 The cables must be connected by a trained technician.

- The manufacturer shall not be considered responsible for any injury or damage caused by improper installation or use.
- The minimum safety distance between the hob and the suction hood is 650 mm (some models may be fitted at a lower height; please see the paragraph relating to working dimensions and installation).
- If the instructions for installation of the gas hob specify a distance greater than the one indicated, this must be taken into account.
- Check that the mains power supply corresponds to the one indicated on the data plate affixed inside the hood.
- The cut-out devices must be installed in the fixed system according to wiring system regulations.
- For Class I appliances, check that the domestic power supply is adequately earthed.
- Connect the hood to the flue using a pipe with a minimum diameter of 120 mm. The fumes must travel the shortest distance possible.
- All the air venting regulations must be complied with.
- Do not connect the ducting hood to flues that also carry combustion fumes (e.g. boilers, chimneys, etc.).
- If the hood is used in combination with non electric appliances (e.g. gas appliances), a sufficient level of ventilation must be guaranteed in the room to prevent any exhaust backflow. If the kitchen hood is used in combination with appliances that are not electrically powered, the negative pressure in the room must not exceed 0.04 mbar to avoid any risk of the fumes being sucked back into the room by the hood.
- The air must not be extracted through a flue that is also used as an exhaust flue for fumes from gas or other fuel powered combustion devices.
- If it is damaged, the power cable must be replaced by the manufacturer or by a service technician.
- Connect the plug to a socket that complies with current regulations and is in an accessible position.

- As regards the technical and safety measures to be taken for exhausting of fumes, it is important that the regulations set by local authorities be complied with scrupulously.

 **CAUTION:** remove the protective films before installing the hood.

- Only use screws and hardware of a sort suitable for the hood.

 **CAUTION:** failure to install the screws or fixing devices as described in these instructions may mean there is a risk of electric shocks.

- Do not look directly at the light through optical devices (binoculars, magnifying glasses...).
- Do not flambé food under the hood: you might cause a fire.
- This appliance may be used by children over the age of 8 years and by persons with limited psycho-physical and sensory abilities or with insufficient experience and knowledge, provided they are carefully supervised and instructed on how to use the appliance safely and on the dangers that it involves. Make sure that children are not allowed to play with the appliance. Cleaning and maintenance to be performed by the user must not be carried out by children, unless they are under supervision.
- Supervise children, to make

sure they do not play with the appliance.

- The appliance must not be used by persons (including children) with limited psycho-physical or sensory capacities or with insufficient experience and knowledge, unless they are carefully supervised and instructed.

 Accessible parts may become extremely hot during the use of cooking appliances

- Clean and/or replace the filters after the period of time indicated (danger of fire). See the paragraph on Maintenance and cleaning.
- The room must be adequately ventilated when the hood is used simultaneously with appliances that use gas or other fuels (not applicable to appliances that only discharge air into the room).
- The symbol  on the product or on its packaging indicates that the product must not be disposed of with the normal domestic waste. The product must be disposed of at a specialist re-cycling centre for electrical and electronic components. By making sure that this product is disposed of properly, you will help prevent possible negative consequences for the environment and for health that might result from its improper disposal. For more detailed information on how to re-cycle

this product, please contact your local municipal offices, local waste disposal service or the shop in which the product was purchased.

### Declaration of Conformity

The manufacturer declares that this device with wireless radio functionality complies with directive 2014/53/EU.

The complete text of the EU declaration of conformity is available at the following link by searching for the product code:

“<https://www.franke.com>”

This code can be found on the label located inside the product.

Fre- quency bands	Maximum transmit- ted power
2.4 GHz	100 mW max.

## 2. USE

- The suction hood has been designed exclusively for domestic use, to eliminate kitchen odours.
- Never use the hood for purposes other than those for which it was designed.
- Never leave high flames under the hood when it is in operation.
- Adjust the intensity of the flame so that it is directed onto the bottom of the cooking pan, making sure it does not wrap around the sides.
- Deep-fryers must be kept under constant supervision when in use: the oil may catch fire if it gets too hot.

## 3. CLEANING AND MAINTENANCE

- The activated carbon filter is neither washable nor regenerable and must be replaced approximately every 4 months of operation or more frequently in case of very intense use (W).

- The grease filters must be cleaned every 2 months of operation or more frequently in case of very intense use and can be washed in a dishwasher (Z).

- Clean the hood using a damp cloth and a neutral liquid detergent.
- Avoid using alcohol or silicone-based products to clean the inside and outside of the cooker hood.

## 4. CONTROLS

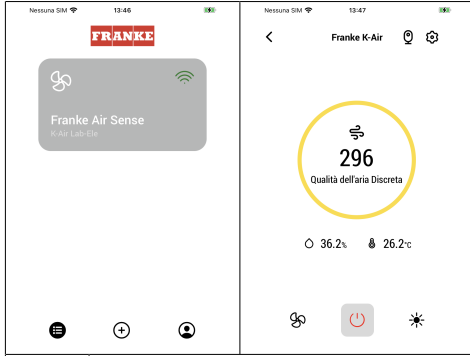

Before using the controls on the hood, perform the guided configuration on the monitor starting from the selection of the desired language.

			S1
			     
			L                      T1                      T2                      T3                      T4
Key	Key press	Function	LED
L	Short	The lights alternate between high intensity, medium intensity (if present), off.	-
	Long press with light on	<b>Induction/Gas Cooktop Selection</b> Select the type of cooktop in use, either Induction or Gas.  The Induction Cooktop is set by default.	1 flash of LEDs T2 and T3: confirms the Induction Cooktop selection.  2 flashes of LEDs T2 and T3: confirms the Gas Cooktop selection.
	Long press with all loads off (motor and lights)	The <b>Filter saturation alarm is reset</b> .	LED T1 flashes 3 times.
T1	Short	Turns the motor on/off at the first speed.	Fixed
T2	Short	Turns the motor on at the second speed.	Fixed
	Long press with light or motor on	<b>24h Function</b> Activates/Deactivates the motor in the 24h Air Exchange mode, a speed that allows suction of 10 minutes every hour, for a 24-hour cycle. Cannot be activated if the Intensive mode is active.	Flashing
	Long press with all loads off (motor and lights)	Activates/Deactivates the <b>Activated Carbon Filters alarm</b> .	LED flashes twice: alarm activated.  LED flashes once: alarm deactivated.
		Signals the <b>saturated Metal Grease Filters alarm</b> and the need to wash them. The alarm is activated after 100 hours of effective hood operation.  Signals the <b>Activated Charcoal Odour Filter saturation alarm</b> . The alarm is activated after 200 hours of effective hood operation.	LEDs T2 and T3 lit with the hood off.  LEDs T2 and T3 flashing with the hood off.
T3	Short	Turns the motor on at the third speed.	Fixed
	Long press with light or motor on	Turns the motor on at the <b>Intensive</b> speed. This speed is timed for 6 minutes. At the end of this time, the system automatically returns to the previously selected speed.	Flashing
T4	Long press with light or motor on	<b>AUTO Mode</b> Activates/Deactivates the Automatic operating mode. AUTO mode is deactivated whenever the speed keys are pressed.  Thanks to the presence of the <b>Air Quality Sensor</b> an algorithm is able to modulate the speed based on the intake air quality level. <b>WARNING:</b> The algorithm function is optimised for the most common types of cooking. Uncommon preparations may produce a non-optimised response.  <b>Air Quality Sensor</b> malfunction. Contact Technical Assistance	Fixed light: AUTO mode activated.  Off: AUTO mode deactivated.
			All LEDs flash.
	Short	See the last function of the key  on the monitor	-

 Key on the monitor	Short	<b>Dims/Wakes up</b> the monitor. The dimmed monitor is not off and can be restarted quickly.  If the motor and the lights are off and if the monitor is not connected to the Wi-Fi/Internet, the monitor is switched off when the key is pressed.	Red LED on the monitor and LED S1 on: monitor dimmed.
	Long	Turns the monitor <b>on/off</b> . Turning the monitor on takes longer than waking it up.	Red LED on the monitor and LED S1 off: monitor off.
	Short press of key <b>T4</b>	Turns the monitor <b>on</b> if it is off.	-

## 5. FRANKE@HOME APP

The Franke@Home App is available for iOS and Android smartphones and allows remote access to all hood functions.

Icon	Function
	Home page
	Add new device
	User profile management
	Connected to the Wi-Fi Franke network
	Hood on/off
	Lighting system management
	Motor speed management
	Intensive Function
	24h Function
	Delay Function
	Automatic Function
	App settings management

## 6. LIGHTING

- Please contact the Service Department to change it ("Please contact the service department to purchase it").
