FRANKE

Design

These mixers are available in Chrome, SilkSteel and Matt Black to complement all Franke sinks.

Service

In the event of parts or service being required, please contact:

Franke FilterFlow 0808 165 0008

Preparation

First shut off your water heating system then, with your mains stop cock closed, open the lowest hot and cold taps in the house and allow to run until the cold storage tank and pipes are empty. (The hot water storage cylinder always remains full).

Installation

First screw the threaded stud into the mixer body. Screw the flexi tails into the mixer body and fully hand tighten.

After making any necessary alterations to existing pipework, fit in position. The 'O'ring should be placed in the recess of the body to make a seal with the sink.

When the tap is in position (with the cold side on the right when viewed from the front) slide the nylon bracing plate up to the underside of the sink together with the retaining plate, and secure by screwing the fixing nut finger tight.

Check that the mixer is correctly positioned and fully tighten fixing nut.

It is recommended that 15mm x 15mm compression fittings be used to connect mixer to supply pipes. Cold is connected to the right and hot on the left when viewed from the front.

Connecting the FilterFlow

Please refer to the diagram and instructions (opposite page).

Attention. Before installing the new mixer it is essential that you thoroughly flush through the supply pipes in order to remove any remaining swarf, solder or other impurities.

Failure to carry out this simple procedure could cause problems or damage to the workings of the mixer.

Having first checked all new connections, turn on the mains stop cock, close all taps except the new mixer and as the system starts to refill check for leaks. Once you have satisfied yourself that there are no leaks, switch on the water heating.

Warning: These hints have been prepared for your guidance, you must exercise due care at all times. We do not accept responsibility for any problems that may occur through incorrect installation.

How to care for your kitchen sink mixer

To maintain the appearance of this fitting, ensure it is cleaned only using a clean, soft damp cloth. A solution of warm water and mild liquid detergent may be used where necessary, and then the fitting rinsed thoroughly. Abrasive cleaners or acidic cleaners **MUST NOT BE USED** under any circumstances. Avoid contact with all solvents.

Technical Data

Maximum water pressure: 75 PSI (5 bar)

Maximum hot-water temperature: 70°C

Recommended hot water temperature: 65°C

Note: If these temperatures or water pressures are exceeded damage to the tap can result.

A pressure reducing valve may be required to be fitted in high water pressure situations.

NB If for any reason the spout is removed from the tap, care must be taken when reinserting the spout into the body to ensure that the Grub Screw (1425R) is located in the split of the white PTFE ring.

Connecting the FilterFlow

Locate the 3/8" diameter stem at the base of your Franke FilterFlow filter tap. Wet the stem with a little water. Select the remaining braided hose (B) with the grey plastic push fit connector (A) attached to the free end. Engage the push fit connector on the tail and push it firmly on the stem.

Important. Initial resistance will be felt as the internal 'O' seal is engaged – continue to push the connector past the seal to the final stop. The connector should push on the stem 10mm (3/8"). Failure to fully engage the connector may result in subsequent failure of the joint.

Available finish

120.0605.927	Chrome
120.0605.928	Silk Steel
120.0605.929	Matt Black

Parts list as follows

FUN number	Part name	Part code
133.0194.029	Antisplash Chrome	SP3620 CH
133.0194.030	Antisplash SilkSteel	SP3620 SS
133.0612.343	Antisplash Matt Black	SP3620 MB
133.0069.183	O-Ring Kit	SP1425
133.0194.085	Spout Chrome	SP3625 CH
133.0194.086	Spout SilkSteel	SP3625 SS
133.0612.344	Spout Matt Black	SP3625 MB
133.0437.465	Hot Handle Chrome	SP4150-H CH
133.0437.466	Cold Handle Chrome	SP4150-C CH
133.0612.347	Filter Handle Chrome	SP4150-F CH
133.0437.467	Hot Handle SilkSteel	SP4150-H SS
133.0437.469	Cold Handle SilkSteel	SP4150-C SS
133.0612.350	Filter Handle SilkSteel	SP4150-F SS

133.0194.036	FilterFlow Fixing Nut Key	SP3619

Guarantee

Your Franke FilterFlow tap has been manufactured to the high standard you would expect of any Franke product but in the unlikely event that you should experience any defect in the materials or workmanship within one year of purchase, we will replace the faulty part free of charge. This is provided the mixer has only been used for normal domestic purposes in the UK and that the care, installation and maintenance instructions have been observed.

You should also retain your dated invoice as proof of purchase to validate any claims under our guarantee.

This one year guarantee is extended to five years in the case of the valve mechanism.

Normal wear and tear is excluded from the guarantee.

Decorative surface finishes are guaranteed for one year from the date of purchase provided our advice concerning care has been observed and no scouring agents have been used.

Scuffs and scratches caused by improper installation or accidental damage are not covered by this guarantee. Neither are slight shade variations or any damage or defect caused by incorrect installation or abuse of the fitting.

Optional tap brace

A large or heavy tap fitted to a stainless steel inset sink may occasionally flex the sink. To counteract this, Franke has developed an innovative tap brace that can be purchased separately. The tap brace connects the tap to the worktop and not just to the sink, offering additional support to the tap and much more stability when fitted. The tap brace has a variable collar to ensure it will fit most models of tap and can be used on any inset stainless steel sink.

The Franke tap brace is available on request from most kitchen retailers.
