Speciality Beverage Station with IndividualMilk Technology* (IMT)

Give your customers true choice with our unique and versatile Specialty Beverage Station SB1200 featuring our game-changing IndividualMilk Technology*. Maximum enjoyment is ensured when you increase beverage choices to include the pure milk varieties today's mindful consumers are demanding. Pure milk choices - it's your promise to your customers. Together with our SB1200 and IndividualMilk Technology*, you can offer purely vegan and purely dairy drinks. Ensure reliable enjoyment all from the same exact, fully automatic coffee machine footprint and all prepared and dispensed absolutely free of cross-contamination and residues.

Capture your share of this growing market demand, expand your customer base, and increase foot traffic when you double the number of milk-style beverage choices on your customized menu. IndividualMilk Technology* is the latest addition to the full range of Franke Coffee Technologies available on the Specialty Beverage Station. It relies on our FoamMaster[™] technology, for hot/cold milk and milk foam, to guarantee two milk varieties remain pure from storage through to in-cup dispensing. Give your customers access to the pure choices they truly want, from espresso-based beverages, to iced coffee, cold brew, or flavored drinks.

CleanMaster for

Flavor Station

CleanMaster

CleanMaster makes daily operations easier. All components and modules are cleaned in an automatic process. This includes the centrally placed all-in-one spout which is cleaned in place, without the need for removal/disassembly.

In addition, the optional Flavor Station unit (FSU60) is equipped with the Flavor Station CleanMaster, an exclusive feature that is unique to this product segment.

Franke Specialty Beverage Station is delivered independently of cabinetry. Furniture must be sourced separately.

SB1200 Speciality Beverage Station: compact footprint

IndividualMilk Technology* Two, fully separate FoamMaster™ systems in one machine customize menus with purely vegan and purely dairv options

iQFlow™ the groundbreaking technology that extracts more flavor for unrivaled in-cup-quality

FoamMaster[™] module integrated as standard for perfect foam, every time

Maximum choice, maximum flexibility, minimum effort: Anywhere you need it. Now, our unique, versatile Specialty Beverage Station SB1200 is available in a more compact footprint to fit the space you already have. The freedom to optimize your self-serve or served coffee business has never been easier with this fully automatic coffee machine solution.

In its new, compact format, Franke's SB1200 takes its one-of-a-kind to-go coffee experience to any customer environment. Just like the original, this smaller footprint SB1200 features a vast variety of beverages - from espresso-based milk and milk foam beverages to iced coffee, cold brew, and flavored drinks.

Making it easier for you to take customer satisfaction to a whole new level, this streamlined version of the SB1200 is still packed with all the Franke Coffee Technologies. The compact SB1200 solution remains state-of-the-art with iQFlow™ technology for extracting the most flavor from every bean, FoamMaster[™] for the perfect, silky texture of hot/cold milk and milk foam. With the CleanMaster for optimal, easy, and reliable hygiene, Flavor Station for unlimited coffee creations, and the outstanding user experience enabled by the 12.1" touch screen.

SB1200 Unmatched beverage variety in every configuration

Cold Brew

The SB1200 features the full range of cold brew beverages. Franke's cold brew module prepares a variety of cold brew beverages, such as "cream on top" or cascade effect without the additional use of nitrogen. Cold brew coffee can be served pure or mixed and served with milk, milk foam and/or syrup. Expand your beverage varieties and offer your customers even more choices - now also including vegan choices.

Pure milk choices with IndividualMilk Technology*

With the new IndividualMilk Technology*, you're offering your customers more than just their choice of milk variety. You're giving them a guarantee. Because whichever milk varieties they choose, it is prepared completely separately from other milk types in the same machine - purely, from storage through to cup.

Cold Brew Infused

Iced Soy Latte

Iced Coffee

Go beyond traditional drinks and enhance your coffee program with Franke's lced Coffee Module. You can even develop a seasonal offering of deliciously refreshing cold espresso-based beverages. The coffee is freshly ground, brewed and then cooled. It can be combined with cold milk, milk foam and syrups. Iced coffee at its best, now vegan too!

Traditional beverages

The SB1200 with the Iced Coffee Module still delivers the traditional range of high in-cup quality beverages, combined with warm and cold milk, milk foam and syrups.

Iced Café Latte

Espresso
