

FRANKE

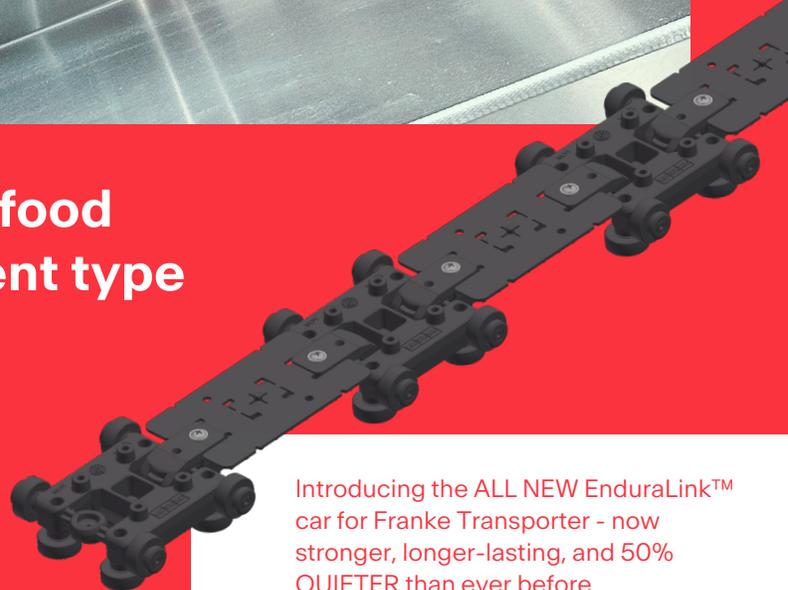

#TRANSPORTER

FRANKE TRANSPORTER

The next generation in smart food conveyance is the strong, silent type

The Franke Transporter is the proven, high performance, reliable modular food carrying conveyor system. By providing the option to detach the kitchen from the point of sale, operators can improve speed of service, reduce real estate, and operational costs.

Introducing the ALL NEW EnduraLink™ car for Franke Transporter - now stronger, longer-lasting, and 50% QUIETER than ever before

Enable greater flexibility in restaurant layouts to address any situation

Noise Reduction

EnduraLink™ cars shown to reduce perceived noise level by over 50%.

Increased Reliability

Extremely durable with minimal maintenance: Literal “weak link in the chain” has been eliminated.

Quicker Installation

New component design and standardized fasteners streamline installation steps and reduce overall completion time.

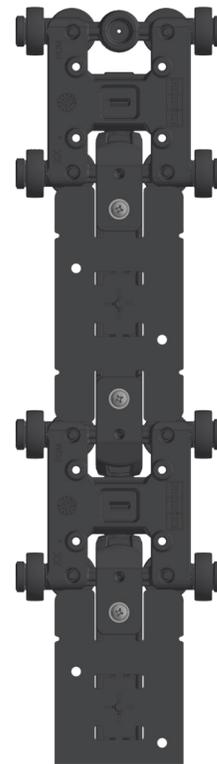

Virtually Unbreakable

Cars wear more predictably without sudden connector breakage.

Product information:

- EnduraLink™ cars = Reduced Noise, Higher Capacity, and Longer Life
- Flexible Layouts – Highly customizable; allows separation of customer service areas and kitchens.
- Higher weight loads are now possible
- Retro-fit capable – plug-and-play with existing systems
- Highly Customizable for Different Store Layouts
- High Speed / Non-Reciprocal
- Multiple Standard System Offerings-Bag & Clip, 3D Carrier Basket, & Vertical Carrier Basket (w/ Prep Line Conveyor Integration)
- Simple Installation – can be done by 3rd party
- Minimal Site Requirements / Simplified Retrofit Opportunities
- Efficient operations – Ensures rapid, hygienic, and unintrusive movement of multiple payloads at a time... all in seconds
- Economical and sustainable – Utilizes minimal and lightweight materials, such as aluminum track, and energy-efficient components that require simple maintenance
- Utilizes lower-cost real estate for kitchens and reduces overall footprint by moving kitchen off the main floor

ALL NEW EnduraLink™
