Years of experience, yet still as curious as kids.

At Franke, we have been looking for new solutions and innovations for over 100 years and our attitude still has not changed. In 1911 we combined traditional craftsmanship, precision engineering and a constant pursuit of innovation, three principles that remain at our core.

A story forged in Swiss precision

Our story began at the beginning of the last century as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke.

Since then, we opened up to the world and inaugurated manufacturing facilities all around the globe that led us to become leaders in the kitchen sinks segment, and home solutions altogether.

“ We believe that sustainability means fairness to future generations ”

Shaping our future

Preserving the environment, shaping the future. As a company conscious of our responsibilities, we think and act today in the interests of the world of tomorrow. We work hand in hand with our partners, customers and suppliers to create a liveable future where people can also thrive.

“We believe that sustainability means fairness to future generations” – this quote from Michael Pieper, owner of the Franke Group encapsulates our company ideals. We reconcile economics and ecology and make a proactive contribution towards sustainable development – with long-lasting products, recyclable materials and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on the three pillars of the environment, employees and the company. When it comes to environment, we focus on the production and lifecycles of our products.

As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for more than two decades – conserving resources in the process. We also feel an immense responsibility towards our employees, of which there are approximately 8700 around the world. Words like appreciation and trust aren't just empty phrases to us, they're deeply embedded in our company's DNA.

We help people to stay healthy and to make their professional aspirations a reality. Franke is synonymous with diversity, equal opportunities, cohesion and a company culture where people want to give their best and contribute their own ideas.

Good for everyone!

Good for our partners and customers.

Good for the planet. Good work.

We believe that sustainability means planning ahead.

We see environmental action as an opportunity and this attitude is also reflected in Franke's products.

A bowl that satisfies all around

If you like to spend time in the kitchen, the Maris bowl brings maximum comfort. It is the centre of all activities and convinces with an impressive design. Moreover, it offers a lot of space, is extremely durable and enhanced with Sanitized: silver ions that prevent germs and bacteria from growing.

you're made of!

Shiny or matte; smooth or stone-like, extra-strong or super trendy. Your kitchen can speak volumes about you, so every detail counts. To offer you the chance to create your very own perfect kitchen, our range of materials is designed to please any taste, match any style and resist any endeavor. Discover each material's precision-engineered character and unique benefits to choose the one that suits your needs the best and you like the most.

Brushed

Polished

Stainless Steel

Whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a Stainless Steel solution for you. Any Franke Stainless Steel product is made from premium quality chrome nickel steel, which looks stunning and is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake, or break. If Stainless Steel is one of the most popular materials in the kitchen, it's for good reason.

Fragranite

An exceptionally tough material, resistant to burns, dents, chips and stains. Pioneered by Franke, it's a unique material with a subtle sheen that is warm to the touch thanks to its 80% granite composition. Also, Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%. A more than relevant feature for our kitchens, as bacteria can multiply every 20 minutes making the kitchen's surfaces highly unhygienic.

Quality in shining armour

Beautiful and made for real-life use. Stainless Steel represents our kitchen ideal.

The sheer quality of Franke products can be seen and felt.

Strong and robust, it maintains its brilliance over time, making it the defining feature of the living spaces in which it is installed.

Its superb technical features ensure that it is always in demand, furthermore, stainless steel is an extremely hygienic material, and is easy to clean and recyclable. Aesthetically pleasing and functional to use: stainless steel really represents quality in shining armour.

Durable

The specific concentrations of nickel and chrome steel render it particularly resistant to extreme temperatures. Its brilliance does not fade over time; on the contrary, its beauty and appeal only increase.

Easy to maintain

Steel is easy to maintain; just a few simple daily steps ensure that it remains a joy to use over time.

Functional

Steel is the material of choice for kitchen professionals, due to the fact that it is resistant, hygienic and safe. Its non-porous surface is extremely easy to clean.

Sustainable and ecological

An environmentally friendly material that is 100% recyclable, can be sourced from scrap materials, and produced without toxic waste.

Maris Bowls

Spectacularly Big

THE MARIS FRAGRANITE BOWL IS VERY MINIMALIST

Our Maris bowls are not only an attraction in the kitchen, they just perfectly fit. No matter how your kitchen is furnished, with us you will find the right colour and the right model. A minimalist product for everyday use and easy maintenance.

The Maris Fragranite Bowl meets all the requirements for modern kitchen use. It is made from Fragranite to last a lifetime, and the material is treated with Sanitized: silver ions that prevent germs, mould and bad smells. But above all, Maris is spectacularly big. With no drainer, washing baking trays, pots and pans has never been easier.

A match with your kitchen

The Maris Fraganite bowl is the ultimate improvement to your kitchen. Our products offer modern looks, clever functions and plenty of space – they combine design and functionality. With a Maris bowl you have a product that simply fits and creates a lot of pleasure and convenience.

Delightfully long-lasting

The bowl includes quartz, one of the hardest materials known to man, and is resistant to temperatures up to 280° C*. It's also resilient to impact and thermal shock, and so scratch-resistant that even knives won't leave marks on the surface.

*180° up to 30 minutes, 280° up to 10 seconds

Amazingly hygienic

What would a bowl be if it wasn't easy to clean? Our bowls are simple to wash and particularly hygienic because they are enhanced with Sanitized, a material that contains silver ions that reduce the growth of bacteria and microbes by 99%.

Inset Fast Fix, our patented fixation system.

Easy-to-install sink in a short space of time, without tools. The inset installation system, with its Fast Fix pre-installed fixation clips, makes the installation quick, safe and simple.

Maris Stainless Steel Bowls

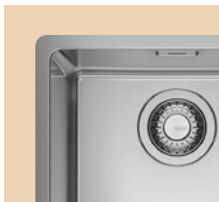

THE MARIS STAINLESS STEEL BOWL IS VERY MINIMALIST

These five new minimalist sinks are made from matt brushed stainless steel. The Swiss-made Maris system comprises multiple elements that can be mixed and matched in any combination for perfect functionality and a harmonious look.

Brushed finish

Like all Franke sinks, the new matt brushed stainless steel sinks provide a tailor-made feel. The models come in variety of different sizes – from the extremely compact 190mm wide to the very spacious 700mm - bowl variant, designed for undermount installation.

(Refer to registered plumber).
Endurance test of 70,000 cycles, complies with EN 814 International Standards.
Reduced flow rate for green rating.
Suitable for balanced water pressure of 200 - 600kPa.

Braided Connectors:

Stainless Steel braiding

Cross-linked inner hose
Brass nuts – 1/2 inch/15mm
or
Brass nuts – 3/8 inch/10mm

Smart Lime Cleaning Aerator:*

Smart Lime Resistance – maximising the lifespan of the aerator
No need to disassemble the aerator for cleaning – simply rub the lime away using your finger.
Perfect stream quality even under difficult flow conditions
Very low noise level.
High quality, the Smart Lime Cleaning Aerator cannot be crushed.
Integrated anti-clogging dome screen - filters sediments and particles.

*Applicable to certain models

Plumbing Kits

Franke Spazi plumbing kits are designed to assist in optimising the underside of the cabinet space and in many cases provide for better utilisation of under-sink storage.

Franke Spazi plumbing kits are made from rigid grey polypropylene and are the ideal hygienic solution to a Franke sink waste system. Spazi plumbing kits have a manifold with an incline and an air vent for faster water disposal. The relevant plumbing kit is shown with each sink throughout this brochure.

Inset Bin

Stainless Steel Lid and 12 Litre Synthetic Bin

The Inset Waste Bin sits neatly in the countertop so food waste can be quickly and hygienically disposed of, while maintaining a minimalistic look.

Product Code: 1340003

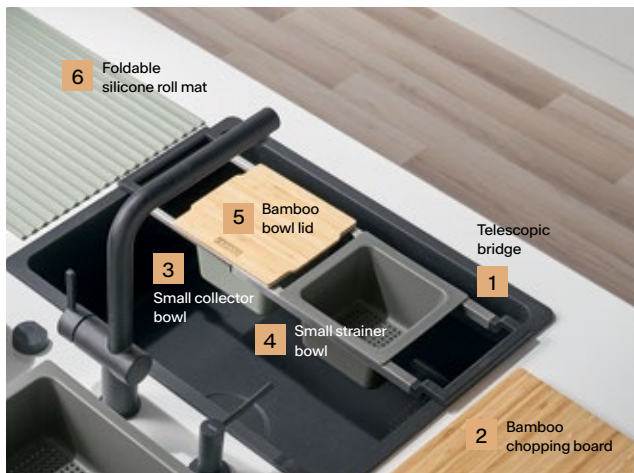

It all comes together with **ALL IN**

The all-in solution for chopping, draining, washing and store your preparations. Transforming any sink with a bowl dimension of up to 54 cm into a stylish and playful workstation, All-In is the flexible food preparation system designed to bring more flow to your kitchen and life.

Up to six accessories, endless uses, fits most* sinks.

*Sinks up to 540mm in width

Prepare

Using the bamboo board, telescopic bridge, strainer and collector bowls,

All-In can help you:

- Chop vegetables and other ingredients
- Collect the cut food
- Collect peeling and deal with waste
- Store prepped ingredients in the fridge

Cook

The bridge, strainer bowls and foldable pad are really useful at the cooking stage and you can:

- Rest pots and pans on the bridge while filling them from the tap
- Use the strainer to drain pasta, or other ingredients
- Stand hot pans and dishes on the foldable pad to protect work surfaces

Clean

When it's time to wash up, the bridge, strainer bowls and foldable pad can also help you to:

- Drain glasses and dishes
- Drain cutlery and cooking utensils

WARRANTY

Telescopic bridge

Material: Surlyn and Inox.

Extendable stainless steel rails with durable handles.

Adjustable to fit bowls up to 540mm.

Chopping Board

Material: Bamboo.

Feet built into underside for stability.

Fits above sink rim, or onto bridge's stainless steel rails.

Small Strainer Bowl

Material: PP Material.

Made from Sanitized material.

Can also serve as a colander or drainer.

Small Collector Bowl

Material: PP without holes. Made from Sanitized material.

Can be used for collecting peelings and dealing with waste during food preparation.

Also suitable for storing food in the fridge.

Bowl Lid

Material: Bamboo.

Fits securely on top of small collector bowl.

Can help to keep food fresh.

Foldable Silicone Roll Mat

Material: Silicone.

With inclined surface for use as a drainer.

Heat resistant surface can hold hot pots and pans

Cleaning & Maintenance

CLEANING INSTRUCTIONS FOR FRANKE STAINLESS STEEL RANGE OF SINKS

INOX CREAM

Product Code: 1120047

250g Inox Cream: cleans, shines, polishes and revitalises Stainless Steel

Cleaning procedure

Clean the Stainless Steel as often as experience dictates (i.e. when noticeably dull or dirty) and use the simplest cleaning procedure that will effectively “do the job”.

- Stainless Steel reacts best to clean water or mild detergent solution, applied with a soft cloth or sponge, rinsed well and wiped dry.
- Routine, simple, gentle and inexpensive cleaning will retain both the corrosion resistance and appearance of Stainless Steel through years of exposure and use. Occasionally a small amount of Inox Cream may be used on a soft, damp cloth with the detergent solution to remove stubborn dirt or slight incipient stains. Rub gently.

Cleaning do's

- Employ regular routine cleaning rather than an occasional aggressive single cleaning.
- Only use propriety brands of cleaners that state “SUITABLE FOR STAINLESS STEEL”, such as Inox Cream.
- Always rinse and dry as the final step in a cleaning procedure.

Cleaning don'ts

- Do not use coarse abrasive powders.
- Do not use metallic scourers or brushes with metal bristles.
- Do not use the so termed “silver cleaners”.
- Do not use acids (except nitric acid in specific instances).

WARNING

Storage of products

Product research has proven that certain household products which are commonly stored underneath a sink, will lead to damage of the sink's base. Chlorine is the major culprit and can be found in: chlorine for swimming pools; household bleach; bathroom cleaning products such as toilet cleaners, mildew treatments and tile cleaners; kitchen cleaning products - especially liquid cleaners; powders for dishwashers and laundry detergents. Preserve the life and beauty of your sink by storing these products away from the sink area in a well ventilated cupboard that is preferably child-proof. Storing these products under your sink will void your warranty.

Do not store detergents & chemicals under sink

The space under your kitchen sink is not only dangerously accessible for children and pets, but harsh chemicals like toilet cleaners, detergents and chemicals can cause even the highest grade of stainless steel sink to corrode. We recommend storing your cleaning products on the top shelf of a laundry room, in your garage or in a well-ventilated locked closet.

HOW TO DRILL A TAP HOLE IN STAINLESS STEEL

When drilling a tap hole DO NOT use a hole saw as this will damage the sink and could cause rust spots from the mild steel hole saw. The correct method is to make the tap hole in your sink is to use a chassis punch.

Scan this QR code to see how to drill a tap hole.

CLEANING INSTRUCTIONS FOR FRANKE FRAGRANITE RANGE OF SINKS

Cleaning procedure for normal everyday cleaning

1. When you are finished using your sink, wipe the sink using a sponge (available in most supermarkets) and water and dry off with a soft cloth, or
2. Clean the sink using a normal detergent and soft cloth, rinse with water and dry with a soft cloth

For more stubborn stains

1. Follow steps 1 or 2 above to remove any film on the surface of the sink
2. Apply a cream cleaner and clean the sink using a scourer sponge (cleaning in circular motions). When using the scourer sponge use considerable force

Suggestion to prevent limescale staining returning after cleaning

Whilst this is not something we have tried in house there are suggestions from various users on the internet to clean the sink thoroughly with washing up liquid or a cream cleaner, rinse well dry off with a cloth. Apply a little baby oil to a clean dry cloth and rub over the sink surface. Initially this was repeated for a few days, thereafter every couple of months. It is important to wipe the sink down after use to prevent a further build up of stains.

Alternative Solutions to Removing Stains that have been used in the past.

a) Dilute a dishwasher tablet in a bowl of very hot water, 3/4 fill the sink bowl with very hot water, add the dishwasher solution to the sink and leave for a few hours.

b)

1. Fill both bowls with a solution of warm water diluted with bleach (A cup full of bleach in around 10 litres of water). DO NOT ALLOW RAW BLEACH TO COME IN CONTACT WITH THE SINK. This should be left for a few hours, tannins will generally bleach out.
2. Following this the entire sink surface needs to be scoured vigorously with a scotchbrite pad and cream cleaner, this will not be a quick fix and may need to be carried out a few times to remove the surface deposits.
3. Do not use raw bleach (either to clean the sink or let it soak in the sink).

c) Mix 1 part of vinegar with 3 parts of water and apply and leave overnight.

Additional Information

Strong alkalis like ammonia and caustic soda, caustic paint strippers, paint brush cleaners and neat chemical descaling agents should be kept away from your sink, as prolonged exposure to them may dull the surface.

Plastic washing up basins should not be used with the sink as small particles of the plastic basin may wear and become embedded into the surface of the sink causing a discolouration effect. Your sink can withstand high temperatures for a short period of time without marking. However, it is better to avoid putting very hot pans directly onto the sink for prolonged periods as the pans may leave a mark on the surface of the sink.

(rubbing hard on the surface of then sink). Work on this for a few minutes (sometimes it can take longer to remove really stubborn stains). On completion rinse the sink with water and dry with a soft cloth. (Do not use a steel wool in place of a scourer sponge as minute particles of the steel wool may become embedded in the surface of the sink).

If the stain is still visible after the above

1. Apply a limescale remover per manufacturer's instructions and clean the sink using a scourer sponge (cleaning in circular motions). When using the scourer sponge use considerable force (rubbing hard on the surface of the sink). Sometimes it takes more than one application to remove really stubborn stains.

On completion rinse the sink with water and dry with a soft cloth. (This is what we recommend for hard water areas where limescale forms on the surface of the sink, but it may be used for other types of stubborn staining).

The products mentioned above are also the standard products we would recommend for cleaning granite composite sinks on an ongoing basis.

Cleaning don'ts

- Do not use brushes with metal bristles or steel wool.
- Do not use acids.
- Do not use drain cleaner in your sink.
- Do not dispose of any building waste or use any contractor cleaning products in your sink. * Please ensure that when renovating, that your sink is properly covered and protected from all building material and contractor cleaning products.

Storage of products

Product research has proven that certain household products which may be stored underneath a sink, can lead to damage of the sink's base. Chlorine is the major culprit and can be found in: chlorine for swimming pools; household bleach; bathroom cleaning products such as toilet cleaners, mildew treatments and tile cleaners; kitchen cleaning products - especially liquid cleaners; powders for dishwashers and laundry detergents. Preserve the life and beauty of your sink by storing these products away from the sink area in a well ventilated cupboard that is preferably child-proof.

HOW TO DRILL A TAP HOLE IN FRAGRANITE

The correct method is to make the tap hole in your sink is to use a diamond drill bit.

A diamond drill bit is supplied with the Ronda prep bowl range as well as the Maris double bowl sinks.

Scan this QR code to see how to drill a tap hole into your Fraganite Sink.

Warranties

FRAGRANITE SINKS

5 years against manufacturing defects.

STAINLESS STEEL DOMESTIC KITCHEN SINKS

25 years against corrosion from date of purchase (*except SA94 sink).
