PRODUCT RANGE

The latest from the world leader
in instantly filtered water.

INDEX

PowerPulse technology

Our innovative Zip PowerPulse technology maintains stored boiling water to within 0.2°C of your set temperature, meaning no energy or time is wasted waiting for water to boil.

Unique safety features

Zip boiling water is delivered smoothly and the tap has a safety lock to facilitate safe boiling water delivery.

Air-cooled system

Our unique air-cooled refrigeration system is 100% water efficient.

Auto-diagnostics

An advanced auto-diagnostics system continuously monitors your HydroTap's performance.

Powered by our latest G5 technology

Embodying functionality, the HydroTap is ideal for those who want appliances that save time, reduce energy, are straightforward to use, simple to maintain and make life in the kitchen a whole lot easier.

Welcome the convenience of cooking, sterilising bottles and making tea or coffee with instant boiling water and the handiness of pouring a perfectly chilled still or sparkling glass of water whenever you need it.

MICROPURITY™ FILTRATION

SAFELY FILTERS DOWN TO 0.2 MICRON

Inbuilt 0.2 micron NSF-certified filter incorporating innovative silver ion antimicrobial technology means healthier, pure-tasting water.

NEW G5 FEATURES

2 Year Warranty

SteriTouch® antimicrobial protection

SteriTouch® is impregnated inside materials in contact with key water paths in HydroTap; Touch Pad, Tubes and Manifold for added protection against bacteria.

CO_2 level indicator

New feature in the command centre shows when CO_2 gas is running low.

Smart Customisation

New optimised menu in the G5 HydroTap command centre allows you to select energy modes and usage settings for easier customisation.

THE SAFEST INSTANT BOILING WATER

Boiling water safety lock

Unique boiling water dispensing safety features requires a dual action reducing the likelyhood of accidently activating the boiling water which means little ones are safer.

Cool touch tap

The HydroTap is cool to the touch and doesn't produce any spluttering steam, which means it's always safe to use.

WARNING: We recommend surge protectors be installed on all hydrotaps new and existing.

SMARTER, MORE INTUITIVE USER INTERFACE, RE-DESIGNED WITH USER EXPERIENCE IN MIND

The new interactive interface makes it so simple to customise your Hydrotap settings.

- Intuitive home screen with easy access to set temperatures for boiling and chilled water, filter and CO_2 life, and energy saving modes and settings

- Quiet mode adjusts the fan speed used as part of the chilling process. Intelligent fan speed automatically adjusts the fan speed between 100, 75 and 50% which can make the Hydrotap G5 quieter during low use.

- Energy saving settings give you the opportunity to set ON and OFF timers letting you set the times your Hydrotap can be used weekly or daily.

- Sleep modes reduce the Hydrotaps power consumption if the tap has not been used for 2 hours. 'Sleep when it's dark function' puts your Hydrotap to sleep when the lights have been turned off.

Experience water at its best. Introducing new HydroTap G5 technology.

POWERED BY
G5
TECHNOLOGY

Able to complement any kitchen – from traditional to contemporary –
Zip's design-led Classic Plus, Touch-Free Wave, Arc Plus and Cube Plus and
have been created with the interiors enthusiast in mind.

2330332	ZIP CO_2 Gas Cartridge (2 Per Pack)

CO₂ GAS CARTRIDGE

2330332	ZIP CO₂ Gas Cartridge (2 Per Pack)

CO_2 Gas Cylinder gives approximately 150 to 160 liters of sparkling water, equivalent to 750 glasses of sparkling water.

Filter cartridges should be replaced after 6,435 litres or every 12 months, or earlier if a high level of water usage makes it necessary. You can replace filter cartridges yourself, or ask for a trained Zip Service Provider to replace them at set intervals.

Carbon Dioxide

The CO_2 gas cylinder must be secured in a suitable location using the strap provided. The gas regulator (supplied) must be fitted. Each cylinder contains 1 kg of CO_2 and should be installed in a well ventilated area or a room of not less than 38 cubic metres.

Please note that commercial units are not supplied with a CO_2 regulator - this is supplied separately

ZIP FILTRATION

UNIVERSAL PRE-FILTER & IN-LINE FILTER KIT

$4C^2$

- 0,2 Micron Filter
- Drinking Water
- Water Coolers
- Rated capacity 11 350L
- Dimensions: 36.2cm x 8.26cm

36.2cm

MH^2

- 0,2 Micron Filter
- High -flow, higher volume brewers
- Rated capacity 34 068L
- Dimensions: 52.7cm x 8.3cm

52.7cm
47.6cm

INSTALLATION TIPS

- Install vertically with cartidge hanging down.
- Flush system by running water through filter for 3 minutes at full flow.
- Change cartridge on a regular 6 month preventative maintenance program.
- Service flow must not exceed 0.5 gpm (1.9 Lpm)
- Allow for 6.35cm clearance below cartridge for easy cartridge replacement.
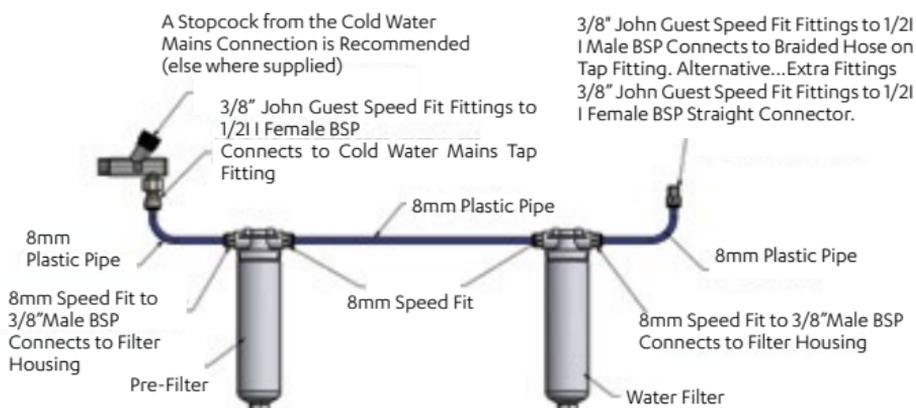

FEATURES AND BENEFITS

- Provides clear, fresh, premium quality ingredient water for consistently great tasting coffee and beverages
- Sanitary cartridge replacment is simple, quick and clean; internal filter parts are never exposed to handling or contamination
- Our unique filter blend using activated carbon reduces chlorine taste & odor and other offensive contaminants
- Proprietary Micro-Pure® II filtration media effectively inhibits the growth of bacteria on the filter media that can decrease product life. NSF/ANSI Standard 53 certified to reduce cysts such as Cryptosporidium and Giardia by mechanical means.

ZIP HYDROBOIL **PLUS**

– The most energy-efficient electronically
  controlled instant boiling water system yet.

2 Year
Warranty

**Instant Boiling
Water on Tap!**

Zip HydroBoil Plus saves energy in 5 ways:

1. Power-Pulse™ technology cuts standby power consumption dramatically. Cuts back to micro-pulse power during periods of light usage, or when unused.

2. Sleep-mode feature can be set to activate after 2 or 4 hours of non-use.

3. Sleep-when-it-is-dark feature can be set to activate whenever lights go off.

4. Programmable 24/7 on/off power clock can disconnect power twice each day.

5. Patented steam-heat-boost system recycles steam to preheat incoming water.

Features
- Large capacity on-wall instant boiling water system.
- Built-in patented technology for increased energy-efficiency.
- Patented twin-chamber technology
  separates incoming cold water from boiling.
- Patented steam-heat-boost technology pre-heats incoming cold water.
- Two-way, cool-to-touch tap for easy and safe dispensing of boiling water.
- Push forward for filling cups, pull back to 'lock on' to fill pots hands-free.
- Dual-port internal water tank access for easy servicing.
- Suitable for all water areas, with stainless steel boiling tank.

Description
- Large capacity instant boiling water heater.
- Patented twin-chamber technology separates incoming mains water from boiling tank so boiling water temperature is not compromised.
- Patented steam-heat-boost feature preheats mains water in the cistern prior to entry into boiling tank.
- Designed to maintain water within 1°C of boiling set point. Factory set to 98°C.
- Internal condensing system retains steam within the heater minimising energy loss.
- Classic two-way tap control for precision filling of cups. Lifting tap locks ON for filling pots.
- Stainless steel boiling chamber with service access ports on top and bottom.
- Temperature control automatically cuts off the power in the event of temperature control failure
  or boil dry situation.

Safety lock can be activated to require adult finger-and-thumb operation.

Display screen signals when each filter change is due - no missed filter changes (filter optional).

Outlet is positioned at base, closer to sink level - for better view, better control.

Patented twin chamber technology.
Stores incoming cold water separately from boiling water.

Patented steam-heat-boost system.
Recycles energy from steam to pre-heat incoming cold water.

Patented TeflonTM metering tube.
Regulates water inflow so boiling at set temperature.

Moulded high temperature insulation.
Superior heat retention performance minimizes boiling water heat loss.

ZIP HYDROBOIL
INSTANT BOILING WATER ON TAP!

HYDROBOIL

Features

- Instant boiling water for tea, coffee, and cooking .
- Designed to operate within 3°C of boiling point with thermal temperature control.
- New energy conserving "Cool Touch" tap provides fingertip control, reduces heat loss and saves energy.
- Two-way tap control for precision filling of cups, locks on for filling pots.
- Fully automatic.
- Steam free.
- Optional filtration systems.
- Choice of brushed Stainless Steel or White Powder Coated.
- Able to deliver between 12 to 300 cups of boiling water at one time depending on choice of model.
- Peak demand-loading is reduced considerably in comparison to traditional kettles and urns.
- Concealed plumbing and electrical connections.

Description

- Twin chamber instant boiling water heater.
- Capacity: 2.5, 5, 7.5, 10, 15, 25, 50 litres.
- Thermal thermostat.
- Available in Stainless Steel or corrosion resistant White Epoxy Powder Coated Steel.
- Thermal cut-out to protect against over-boiling and complications occurred during water supply interruption.

SAVES TIME!
The HydroBoil provides instant boiling water 24 hours a day.

HYGIENIC!
Concealed cistern, ensuring the ultimate in hygiene and protecting cupboards from steam damage.

SAVES SPACE!
Eliminates the need for kettles, urns and exposed power leads.

SAVES ENERGY!
Two-way tap control for a cup full or a teapot full at a time.

Patented steam heat boost system.
Recycles energy from steam to pre-heat incoming cold water.

Patented twin chamber technology.
Stores incoming cold water separately from boiling water.

High temperature insulation.
Superior heat retention performance minimises heat loss.

The ZIP Hands-Free Boiling Tap Adapter fits over the tap of your HydroBoil.

Place Hands Free Tap Adaptor over the Boiling Tap. Ensure adaptor is tightly fitted.

Dispense boiling water using only a cup or mug, ensuring dispensing water is completely Hands-Free and hygienic.

Place a mug/ cup against the Adaptor to dispense boiling water. CAUTION to be taken when dispensing Boiling Water!

Product Code: 2120244

ZIP HYDROBOIL PLUS & HYDROBOIL INSTALLATION
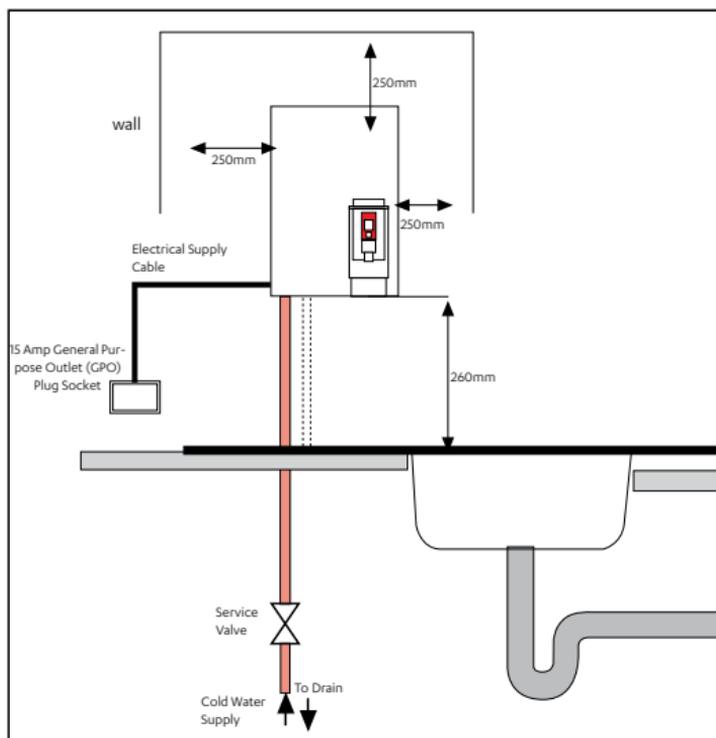

Refer to the Installation Guide for details (included with the product)

Location

To be installed over a sink draining board or a bench top equipped with a portable or plumbed drip tray. Tap outlet clearance to sink 260 mm unless pot filling requires greater access. Minimum service accaess clearance of 250 mm above, 250 mm to left, 250 mm to right. The vent within the case must discharge to a safe visible position as, under certain conditions, the vent may discharge cold or boiling water, and/or steam.

Electrical

To be connected in accordance with the current South African wiring regulations. The 2.5 to 25 liter models to be connected to a 15 Amp GPO, 220-240V. 50Hz power supply within 1500mm of the system. The 50 liter model must be connected to a 380Volt, 3 phases. 50 Hz electrical connection with a separate isolator. The switch must provide all –poles disconnection with contact separation of at least 3mm. For concealed electrical connections, connect cable from the rear directly to internal terminal block.

Plumbing

To be installed by a qualified plumber in accordance with manufacturer's instructions and South African plumbing regulations. Designed for direct connection to a potable cold water supply with minimum pressure of 70 kPa; maximum 600 kPa. If static pressure exceeds 600 kPa, a pressure reducing valve must be fitted. An isolating valve should be installed between the water supply and the system.

Maintenance in hard-water areas

In areas where hard water may occur, such as in the eastern and southern coastal regions of South Africa, the product lifespan could be reduced due to build-up of scale. Regular de-scaling should be carried out by a Zip service provider every 6 to 12 months depending on the severity of the conditions. Contact the Franke call centre at 031 001 5000 for assistance.

Scan this QR code to view the installation instructions on YouTube

How to use the QR Code:

1. Click on the QR Code icon to open the application on your tablet. For example, if you have NeoReader installed, click on the NeoReader icon.
2. Place your tablet's camera over the QR code (2d bArc Plusode) so it fits on your screen
3. Your tablet will 'decode' the bArc Plusode and the content will be displayed on the screen

OPTIONAL EXTRA: ZIP TUNDISH

The Tundish is the ideal solution to prevent bacteria from growing and entering your drinking water.

Installing a Tundish on your vent system creates an "Air Gap" which effectively breaks the link between the Hydroboil and the overflow waste. It is ideal for hidden plumbing and still offers a visible inspection if there is an overflow from the unit.

With two options available: either wall mounting or sink mounting, there is a solution available to suite your requirements.

IMAGE	CODE	DESCRIPTION
	2330583	ZIP TUNDISH - WALL MOUNTED
	2330584	ZIP TUNDISH - SINK MOUNTED

ZIP CHILLTAP

Instant Chilled Drinking Water

(Optional Filtration Kit)

*Font kit assembly sold separately

CHILLTAP (UNDERCOUNTER UNITS)

PRODUCT CODE	DESCRIPTION	UNIT DIMENSIONS WxDxH (mm)	CHILLED GLASSES
2610027	ChillTap *	350 x 350 x 410	42L

* Includes Carafe Spout

Features

- Instant chilled drinking water at your fingertips.
- Cost effective solution to buying and storing bottled water.
- Delivers refreshingly chilled water between 5°C and 10°C.
- Chiller system stored out-of-sight under the bench top.

Description

- Under-counter water chiller.
- Chrome plated brass tap with quarter turn action lever and 360° swivel spout.
- Up to 140 glasses of chilled water per hour.
- Chilled water temperature is maintained between 5-10°C.
- Cost effective alternative to bottled water.
- Vented system to ensure system is never compromised due to surges in water pressure.
- Air cooled condenser with a compressor rated at up to 0.25hp.

IMPORTANT SAFETY NOTICE

PLEASE READ CAREFULLY. CALL THE FRANKE CALL CENTRE AT 031 001 5000 IF IN DOUBT OR IF YOU NEED ASSISTANCE.

Your Zip is designed to produce boiling water. Remember that boiling water is dangerous so follow the important instructions in these guidelines to avoid accidents.

Use a competent plumber to install your ZIP product

In terms of Government notice No.R.1875 of 31 August 1979, no person shall perform the trade of plumbing unless he is a trained plumber or works under the adequate control of a trained plumber or approved competent person.

Where to find a competent plumber

The Plumbing Industry Registration Board (PIRB) controls plumbing practices and registered plumbers can be found on their website www.pirb.co.za.

Maintenance in hard-water areas

In areas where hard water may occur, such as in the eastern and southern coastal regions of South Africa, the product lifespan could be reduced due to build-up of scale. Regular de-scaling should be carried out by a Zip service provider every 6 to 12 months depending on the severity of the conditions. Contact the Franke call centre at 031 001 5000 for assistance.

NOTE: If water is not of a potable quality the warranty may be void.

Operating your ZIP

Every Zip product is supplied with a user manual which contains instructions for the installation of the Zip Product, its use and maintenance, as well as warnings relating to the risk of injury or damage that could arise from its use. The installation must be carried out in accordance with the instruction manual. The user manuals can also be downloaded from the Zip website www.zipsa.co.za.

Product Warranty and the Consumer Protection Act

Franke South Africa warrants the product to be of good quality, in good working order and free from all defects for a period of 1 year from the date of delivery within the regions of South Africa, Namibia and Botswana. Franke's liability in terms of the warranty is limited to either repairing or replacing the damaged or defective Zip product. This warranty is given in addition to any warranty that may apply in terms of the Consumer Protection Act, 2000.

Standard Terms and Conditions

Details of the standard conditions of sale that apply to the sale of all Zip products in South Africa, Namibia and Botswana, unless otherwise agreed by Franke South Africa can be obtained from the Zip website **www.zipsa.co.za.**
